of

unreason

*'We are entering an age of unreason,
a time when the future, in so many
areas, is to be shaped by us and for us;
a time when the only prediction that
will hold true is that no prediction will
hold true; a time, therefore, for bold
imaginings in private life as well as public; for
thinking the unlikely and doing the unreasonable.'*

Engines Of Prosperity: Templates For The Information Age John D Trudel, Gerardo R Ungson, 1998-09-28 The world of business is in the throes of a new revolution It is paradoxically both the best and worst of times Opportunity abounds but the economic societal and technological foundations of the Machine Age are crumbling Confounded by chaos and heavily pressured for results most Western managers have no better ideas for how to compete than to endlessly copy each other cut costs and buy up rivals Downsizing is epidemic and decline common Clearly the world is going through a major transition When this transformation is completed it will look very different This upheaval will change everything but the focus and maximum stress point is economic In the future world power and national prosperity will increasingly depend on the ability to compete in high value added product market areas The winners will develop new societal models for business economics government and education This current and authoritative book is the joint product of an academician and a business practitioner both of whom share a deep concern about the inadequacy of current models and practices It examines the new environment and explores the underlying drivers the Engines of Prosperity that set the new rules of competitive rivalry It provides timely advice for managers on how to operate in a world characterized by Information Age technology rapid change deepening global linkages increasing returns to scale and the continuous unbundling of value chains *The Invisible*
