The American Planner Biographies And Recollections:

The American Planner Donald A. Krueckeberg, Rutgers University. Center for Urban Policy Research, 1994 This is a book about the giants of American planning the urban and regional planners who shaped the American landscape over the last century In sensitive compelling essays the contributors explore the myths and virtues of the planning profession in human terms the frustrations hopes anger pride fears dreams and foolishness of the leading practitioners of the field Donald A Krueckeberg s unique compilation of biographies shows how planners were molded by the conflicting demands of self and culture and how that fusion was reflected in their actions and impacts on American society Catherine Bauer Alfred Bettman Daniel Burnham Kevin Lynch Benton MacKaye Lewis Mumford Frederick Law Olmsted Rexford Tugwell and a host of other visionaries come to life on the pages of this work Why should we read these stories In the sharing of these secrets Krueckeberg writes planners form a culture a community of ideas and contentions that define and redefine our salvation in our practices The book realizes the hope of all good biography it shows how particular planners acquired their personalities from the demands of self and culture and how that fusion was reflected in their actions and their impacts on American society This is essential reading for every planner from student to hardened veteran *A Decision-centred View of Environmental Planning* A. Faludi, 2013-10-22 Planning theorists are often criticised for being insufficiently concerned with the needs of practitioners The author of this book takes a view of planning which centres around the decision making process and offers a theoretical approach which takes practice as its starting point Building on his earlier important work *Planning Theory* Pergamon URPS 1984 first edition 1973 this book constitutes a further major advance in planning thought synthesizing the influence of the British IOR School with the American rational planning model Going beyond previous generic approaches the work culminates in a consideration of theory and practice in the planning of all forms of environmental intervention **Between Justice and Beauty** Howard Gillette, Jr., 2011-06-03 As the only American city under direct congressional control Washington has served historically as a testing ground for federal policy initiatives and social experiments with decidedly mixed results Well intentioned efforts to introduce measures of social justice for the district s largely black population have failed Yet federal plans and federal money have successfully created a large federal presence a triumph argues Howard Gillette of beauty over justice In a new afterword Gillette addresses the recent revitalization and the aftereffects of an urban sports arena Greater Gotham Mike Wallace, 2017-09-04 In this utterly immersive volume Mike Wallace captures the swings of prosperity and downturn from the 1898 skyscraper driven boom to the Bankers Panic of 1907 the labor upheaval and violent repression during and after the First World War Here is New York on a whole new scale moving from national to global prominence an urban dynamo driven by restless ambition boundless energy immigrant dreams and Wall Street greed Within the first two decades of the twentieth century a newly consolidated New York grew exponentially The city exploded into the air with skyscrapers jostling for prominence and dove deep into the

bedrock where massive underground networks of subways water pipes and electrical conduits sprawled beneath the city to serve a surging population of New Yorkers from all walks of life New York was transformed in these two decades as the world s second largest city and now its financial capital thriving and sustained by the city s seemingly unlimited potential Wallace s new book matches its predecessor in pure page turning appeal and takes America s greatest city to new heights

The Great Society Subway Zachary M. Schrag,2014-08 As Metro stretches to Tysons Corner and beyond this paperback edition features a new preface from the author Drivers in the nation s capital face a host of hazards high speed traffic circles presidential motorcades jaywalking tourists and bewildering signs that send unsuspecting motorists from the Lincoln Memorial into suburban Virginia in less than two minutes And parking Don t bet on it unless you re in the fast lane of the Capital Beltway during rush hour Little

wonder then that so many residents and visitors rely on the Washington Metro the 106 mile rapid transit system that serves the District of Columbia and its inner suburbs In the first comprehensive history of the Metro Zachary M Schrag tells the story of the Great Society Subway from its earliest rumblings to the present day from Arlington to College Park Eisenhower to Marion Barry Unlike the pre World War II rail systems of New York Chicago and Philadelphia the Metro was built at a time when most American families already owned cars and when most American cities had dedicated themselves to freeways not subways Why did the nation s capital take a different path What were the consequences of that decision Using extensive archival research as well as oral history Schrag argues that the Metro can be understood only in the political context from which it was born the Great Society liberalism of the Kennedy Johnson and Nixon administrations The Metro emerged from a period when Americans believed in public investments suited to the grandeur and dignity of the world s richest nation The Metro was built not merely to move commuters but in the words of Lyndon Johnson to create a place where the city of man serves not only the needs of the body and the demands of commerce but the desire for beauty and the hunger for community Schrag scrutinizes the project from its earliest days including general planning routes station architecture funding decisions land use impacts and the behavior of Metro riders The story of the Great Society Subway sheds light on the development of metropolitan Washington postwar urban policy and the promises and limits of rail transit in American cities

Making the Invisible Visible Leonie Sandercock,2023-04-28 The history of planning is much more according to these authors than the recorded progress of planning as a discipline and a profession These essays counter the mainstream narrative of rational scientific development with alternative histories that reveal hitherto invisible planning practices and agendas While the official story of planning celebrates the state and its traditions of city building and regional development these stories focus on previously unacknowledged actors and the noir side of planning Through a variety of critical lenses feminist postmodern and postcolonial the essays examine a broad range of histories relevant to the preservation and planning professions Some contributors uncover indigenous planning traditions that have been erased from the record African American and Native American traditions for example Other contributors explore new themes themes of gendered spaces and racist practices of planning as an ordering tool a kind of spatial police of bodies cities and social order influenced by Foucault Lefebvre and others and of resistance This scrutiny of the class race gender ethnic or ideological biases of ideas and practices inherent in the notion of planning as a modernist social technology clearly points to the inadequacy of modernist planning histories Making the Invisible Visible redefines planning as the regulation of the physicality sociality and spatiality of the city Its histories provide the foundation of a new alternative planning paradigm for the multicultural cities of the future The history of planning is much more according to these authors than the recorded progress of planning as a

discipline and a profession These essays counter the mainstream narrative of rational scientific development with alternative histories that re *Historical Roots of the Urban Crisis* Henry L. Taylor Jr., Walter Hill, 2013-06-17 This collection of 12 new essays will tell the story of how the gradual transformation of industrial society into service driven postindustrial society affected black life and culture in the city between 1900 and 1950 and it will shed light on the development of those forces that wreaked havoc in the lives of African Americans in the succeeding epoch The book will examine the black urban experience in the northern southern and western regions of the U S and will be thematically organized around the themes of work community city building and protest the analytic focus will be on the efforts of African Americans to find work and build communities in a constantly changing economy and urban environments tinged with racism hostility and the notions of white supremacy Some chapters will be based on original research while others will represent a synthesis of existing literature on that topic
