Atlantis and the Coming Ice Age Frank Joseph, 2015-03-16 Reveals the parallels between the rise and fall of Atlantis cultures in ancient Mesoamerica and our modern civilization Links the demise of Atlantis with the birth of the Olmec civilization in Mexico the beginning of the first Egyptian dynasty and the start of the Mayan Calendar Reveals the Atlantean and Mayan prophecy of an eternal cycle of global creation destruction and renewal and how we are headed into a destructive phase Shows how ancient prophecies correlate precisely with the latest climatology studies the rising incidence of solar flares and papers from Pentagon and NASA analysts With the passing of the Mayan Calendar's end date we can now focus on the true significance of what the Maya and their predecessors were trying to convey to future civilizations Frank Joseph reveals how the Mayan prophecy symbolized by their calendar was created through the combined genius of Atlantis and Lemuria and predicts an eternal cycle of global creation destruction and renewal He shows how this cycle correlates precisely with scientific studies on glacial ice cores and predictions from the Hopi the Incas and the Scandinavian Norse as well as the visions of Edgar Cayce He links the demise of Atlantis with the birth of the Olmec civilization in Mexico the progenitors of the Maya the beginning of the first Egyptian dynasty and the start of the Mayan Calendar Drawing on the latest climatology studies and papers from Pentagon and NASA analysts he reveals that we are on the brink of a destructive phase in the global cycle of change as predicted by the Atlanteans and the Maya The world's current political economic and

Substance of the Ancient Maya Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 *Substance of the Ancient Maya* Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the relationship between the living and the realm of the

supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past
