Carver, 2023-12-19 An Interdisciplinary Approach to Aging Biohacking and Technology focuses on a broad range of issues that cover everything from the most basic ways technology and biohacking influence people's everyday lives to concerns about equity, globalization and how we humans produce, consume and are consumed by our technologies. This edited collection looks at the intersection between technology and aging, addressing the ways in which technology affects individuals, groups, local communities and entire populations. Contributions from a range of disciplines including sociology, philosophy, communications, medicine and religion provide interdisciplinary perspectives addressing questions such as: What is the impact of technology on adult bodies, our well-being and our safety? The book explores risks such as surveillance, technology, body modification and the Internet as well as issues in the aging journey such as the body and its modification, communication, privacy and surveillance, gerontechnology and aging in place. Critically examining the journey of ageing and exploring techniques such as biohacking, this book is for students studying aging and technology including courses such as psychology, sociology, philosophy, cultural studies, health studies and gerontology. It will also be of interest to scholars who are curious about an interdisciplinary approach to age and technology.

Biohackers Magazine Issue 13 Biohackers Magazine Team, Metaverse Virtual Mixed Reality: A New Era for Biohacking. As the medical industry advances into lipid nanoparticle medicines for oncology and infectious disease management, the Artificial world is taking another dimension. The pandemic has accelerated this development even further because of the sudden increased need for remote collaboration. In the last decade, there is a real buzz for micro dosing psychedelics, brainpower and anything related to genetics, neuroscience, Virtual Reality, Augmented Reality already gives us access to expanded sensory-based cognitive experiences, but the new category of experience that is emerging now is Neural Reality. When consciousness and the senses are turned inward, Neural Reality is complex and rich with information. And we are back to the basics: Biohacks. Biohackers Magazine Issue 9 Biohackers Magazine, The importance of continual self-improvement and development cannot be understated, especially in the world of biohacking. But there is also something that cannot be overstated in this same realm of personal health and growth, and that is the vital role that women play. Often argued and affirmed as the more intuitive of the 2 sexes, women have and continue to push themselves and their community towards their health, wellness and wisdom goals. In a lot of ways, men have it easy. Our bodies' instruction manual is comparable to a generic IKEA coffee table's guided instructions: not a lot to decipher. But some could compare women's bodies' manuals to NASA's rocket construction directions: a lot of steps and A LOT to understand. Granted, the woman's body is easily the more attractive of the two in my opinion, and I want it to be clear that although this statement is biased, I mean this as a more aesthetic, art-like manner. The symmetry, the intricacy, the mysteriousness, the gracefulness, just the way everything

connects Perhaps its because of this clear advantage in the beauty category that it takes a lot to master all the processes within it It once was said that in the beginning God first made man but then afterwards he took a long look at him and then told himself I can do better than that and then made woman Women are at the forefront of biohacking and its clear that the industry would not be where it is today without them Due to women having to figure out all of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman s thought and word is just as important as every man s And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new woman ful issue Everyday Biohacking Alessandro Totaro,2025-09-29 A body that sleeps better a sharper mind days filled with more energy you don t need expensive technology you need smart choices Everyday Biohacking Practical Strategies to Optimize Body and Mind in Daily Life is the narrative scientifically grounded handbook that turns ordinary habits into extraordinary results No hype no gimmicks here you ll find simple verifiable and sustainable protocols built on clear pillars sleep functional nutrition energetic routines to improve your quality of life without wasting time or money With an engaging yet authoritative style the book guides you to become your own personal scientist set up micro experiments observe your body s data without obsession adapt strategies and automate the habits that matter most You ll discover how to synchronize light darkness and temperature for true rest how to apply chrononutrition and intermittent fasting with discernment how to feed your brain not just your stomach how to breathe to calm stress spikes and reignite focus and how to build five minute micro routines that shift the momentum of your entire day Each chapter combines rigor with practicality real life mini cases actionable steps and low cost suggestions you can test immediately The goal is not perfection but daily consistency small changes big impact Who this book is for Professionals students and parents with limited time but a strong desire for well being Anyone seeking measurable results without trends or gadgets Readers looking for a clear inspiring and scientifically honest guide Final reminder longevity cannot be bought it must be cultivated One choice a day applied with method **Biohacking: The Science of Optimizing Your Body - Discover the Path to Peak Health, Performance, and Longevity** Ciro Irmici,2024-11-03 Biohacking The Science of Optimizing Your Body Discover the Path to Peak Health Performance and Longevity Unlock your full potential with the transformative power of biohacking Biohacking The Science of Optimizing Your Body is your comprehensive guide to mastering health enhancing mental performance and extending vitality through proven science backed strategies Dive into essential techniques for nutrition
