H2LiftShips - Beyond Luna Bob Freeman, 2021-03-24 *H2LiftShips* a tech manual for a future. Imagine a world exactly like ours but different. You all knew we would settle on Luna and start mining the Asteroid belt. Mars, dry, dusty, with thin, unbreathable air, is just a prison planet with the added hell of lawyers and accountants in charge. Asteroid groups are unified in their desire for independence, to try different governance methods. It may not be our future, but it is a future we can get behind. Travel the solar system on solar sail ships. Meet hard working sentients: humans, canines, simians, and octopuses plying our heliosphere for fun and profit. You won't find any exploding rockets, evil aliens, laser blasters, or sparking computers. Instead, you'll find hacked comm lines, buried Luna casinos, pirates, dust balls, and weaponized beef jerky. And after your cruise through the Asteroid belt, Mars, and Luna, settle down on Earth for a party in the desert. They'll bring the Carne Asada burritos, you bring the fun. No matter what regime is in charge, Gig workers have to jump from job to job, trying to earn enough for food, shelter, air, and waste disposal. Welcome. Join humans, simians, canines, and octopuses in our new future, gigging and living in the void.

New Approaches to Transcodification Massimo Fusillo, Dorian Legge, Mirko Lino, Mattia Petricola, Gianluigi Rossini, 2025-08-04 This collection aims to renew our perspective on adaptation and intermedial processes by thinking of them in terms of codes rather than media. As a result, the notion of transcodification emerges as a crucial tool in order to study the circulation of semiotic and aesthetic resources across disciplines, knowledge systems, and cultures. Defined as the

transfer of meaning making potential from one semiotic domain to another transcodification both includes and transcends intermediality thus dramatically expanding the scope and research potential of adaptation and intermedial studies The essays collected here apply this framework to an incredibly wide variety of objects and issues from the relationship between art and historiography to the visual culture of finance from contemporary approaches to ekphrasis to the hidden labor of screenwriters from modern surveillance to digital comics from fansubbing to the reception of the classical world in the digital age from medieval theater to the role of videogames in the war on terror By fostering dialogue between radically different disciplines the book offers a unique approach to the study of semiotic interrelations across the most diverse aspects of human culture
