Animals as Biotechnology Richard Twine, 2010 In *Animals as Biotechnology* sociologist Richard Twine places the question of human animal relations at the heart of sustainability and climate change debates The book is shaped by the emergence of two contradictory trends within our approach to nonhuman animals the biotechnological turn in animal sciences which aims to increase the efficiency and profitability of meat and dairy production and the emerging field of critical animal studies mostly in the humanities and social sciences which works to question the nature of our relations with other animals The first part of the book focuses on ethics examining critically the dominant paradigms of bioethics and power relations between human and non human The second part considers animal biotechnology and political economy examining commercialisation and regulation The final part of the book centres on discussions of sustainability limits and an examination of the prospects for animal ethics if biotechnology becomes part of the dominant agricultural paradigm Twine concludes by considering whether growing calls to reduce our consumption of meat dairy products in the face of climate change threats are in fact complicit with an anthropocentric understanding of sustainability and that what is needed is a more fundamental ethical and political questioning of relations and distinctions between humans animals and nature

[The Oxford Handbook of Biblical Narrative](#) Danna Nolan Fewell, 2016 *The Oxford Handbook of Biblical Narrative* is a state of the art anthology that highlights biblical narrative's aesthetic characteristics its ethical and religious appeal its organic qualities as communal literature its witness to social and political negotiation and its uncanny power to affect readers and hearers across disparate time frames and global communities

[Animal Narratives and Culture](#) Anna Barcz, 2017-03-07 The term vulnerable realism can imply two different understandings one presenting weak realism as incomplete and mixed with other literary styles the other bringing realistic vulnerable experience into narration The second is the key concern of this work though it does not exclude the first as it asks questions about realism as such entering into a polemic with the tradition of literary realism Realism then is not primarily understood as a narrative style but as a narration that tests the probability of nonhuman vulnerable experience and makes it real The book consists of three parts The first presents examples of how realism has been redefined in trauma studies and how it may refer to animal experience The second explores what is added to the narrative by literature including the animal perspective the zoonarrative and how it is conducted zoocriticism The third analyses cultural texts such as painting circuses and memorials which realistically generate animal vulnerability and provide non anthropocentric frameworks anchoring our knowledge in the experience of fragile historical reality

[Eden's Other Residents](#) Michael Gilmour, 2014-06-20 *The Bible*

teems with nonhuman life from its opening pages with God's creation of animals on the same day and out of the same earth as humans to its closing apocalyptic scenes of horses riding out of the sky. Animals are Adam's companions, Noah's shipmates, and Elijah's saviors. They are at the center of ancient Israel's religious life as sacrifices and yet, as Job discovers, beyond human dominion. It is an animal that saves Balaam from certain death by an angel's hand, and an animal that carries Jesus into Jerusalem. The Creator declares all of them good at the beginning, and since the Apostle Paul writes of God's eternal purposes for all things on earth, they are somehow part of a hoped-for eschatological restoration. So why are animals so often ignored in Christian moral discourse? In its theological thinking and faith-motivated praxis, human-centeredness typically results in the complete erasure of the nonhuman. This book argues that this exclusion of animals is problematic for those who see the Bible as authoritative for the religious life. Instead, biblical literature bears witness to a more inclusive understanding of moral duty and faith-motivated largesse that extends also to Eden's other residents.

Heterotopia, Radical Imagination, and Shattering Orders Paula Arcari, 2024-12-13

This volume takes ending the oppression of other animals seriously and confronts the question: What would happen to all the animals by showcasing real promissory and imagined counter sites or heterotopia where animals happen in different ways, free of anthropocentric orders of value and purpose? Rejecting persistent understandings of the oppression of nonhuman animals across the entire breadth of the Animal Industrial Complex (AIC) as either non-existent, unproblematic, and/or fundamentally unalterable, open to merely being reduced in scale or made less harmful, the collection offers readers a variety of pathways towards radically disordered ways of thinking about and relating to other animals. Over 14 chapters, authors describe more liberatory relational reconfigurations playing out in the present and undertake conceptual, imaginative, and embodied explorations of liberatory futures. The chapters are united by a common commitment to heterotopic disturbance, to contesting and subverting the anthropo-capitalo-centric space in which we live. Each chapter approaches this subversion in its own way, using prefiguration, restorying, speculation, radical imagination, and combinations thereof to disturb or shatter orders, explore the kinds of liberation and resistance their disturbance demonstrates, demands, or embodies, and ultimately illustrate exactly what would or could happen to all the animals.

Heterotopia, Radical Imagination, and Shattering Orders will appeal to scholars, students, and individuals interested not only in challenging normalised binaries, hierarchies, and orders of value, both human and nonhuman, but in creating and realising liberatory alternatives. Scholar-activists, activists, professionals working in animal advocacy, and anyone undertaking activities aimed at radically changing how other animals are understood and used will also find inspiration, new insights, and information that enhance their current methods and approaches. Some readers may also find simply confirmation and comfort in the knowledge that so many others are working in solidarity with the disordered belief that shattering the AIC is possible.
