I can do better than that and then made woman Women are at the forefront of biohacking and its clear that the industry would not be where it is today without them Due to women having to figure out all of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman s thought and word is just as important as every man s And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new woman ful issue

Food Matters Salman Akhtar, Nina Savelle-Rocklin, 2023-09-14 With contributions from Prachi Akhavi Salman Akhtar Cuneyt Iscan Surreya Iscan Alan Michael Karbelnig Kelsey Leon Clara Mucci Nina Savelle Rocklin Asmita Sharma Julian Stern and Thomas Wolman
Food matters begin even before birth with the absorption of nutrients in the womb and continue through baby feeds family meals school dinners barbecues with friends and romantic meals to the growing dietary restrictions of old age
The role of food is not limited to its life giving necessity but plays a huge role in communal bonding cultural tradition and self expression
Food Matters investigates the significant role that food plays in all of our lives and is divided into three major sections
Mostly biological Mostly psychological and Mostly sociological
Mostly because biology psychology and sociology are not hermetically sealed subject areas and overlaps into other fields are to be expected
Part I Mostly biological consists of two chapters
The first pertains to food and health the second to food and illness
At its core Chapter One aims to undermine the notion of healthy choices and demonstrate a more nuanced vision of what actually builds healthy communities
The varied case material of Chapter Two shows the myriad roles food can play in relation to illness
Part II Mostly psychological has four chapters which respectively address the relationship between food and sexuality aggression narcissism and morality using wide ranging theory and practical case examples
Part III Mostly sociological has three chapters
The first pertains to money the second to immigration and the third to movies again packed with relevant theory and clinical vignettes and in the case of the final chapter using the movies Waitress and Babette's Feast to show the central role food plays even in our fictional lives
This welcome smorgasbord of ideas from an international array of contributors representing the disciplines of psychiatry psychology psychoanalysis anthropology and gastroenterology will be essential reading for professionals and academics in those fields and will shed fresh light on the subject for anyone with an interest in the multifaceted meanings of food matters
