Collection Cli Fi Novel:

The Routledge Anthology of Climate Fiction Bill Gillard, 2024-11-26 The Routledge Anthology of Climate Fiction brings together key works from the Bible to the twentieth century in an accessible resource for students and teachers alike With a robust variety of works including H G Wells Clare Winger Harris H P Lovecraft Leslie F Stone and Arthur Conan Doyle The Routledge Anthology of Climate Fiction offers vital new perspectives and critical introductions all the way back to humanity's earliest surviving literary texts

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged Cli Fi and Class focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn

Apocalyptic Visions in the Anthropocene and the Rise of Climate Fiction Kübra Baysal, 2021-08-10 With the increasing interest of pop culture and academia towards environmental issues which has simultaneously given rise to fiction and artworks dealing with interdisciplinary issues climate change is an undeniable reality of our time In accordance with the severe environmental degradation and health crises today including the COVID 19 pandemic human beings are awakening to this reality through climate fiction cli fi which depicts ways to deal with the anthropogenic transformations on Earth through apocalyptic worlds as displayed in works of literature media and art Appealing to a wide range of readers from NGOs to students this book fills a gap in the fields of literature media and art and sheds light on the inevitable interconnection of humankind with the nonhuman environment through effective descriptions of associable conditions in the works of climate fiction

Climate Fiction: Ecological Dimensions Ananya Mukherjee, Tanmoy Baghira, 2025-06-15 Climate Fiction Ecological Dimensions offers an introspective gaze into intersections of literature film and ecology to recognise how fiction mediates the Anthropocene Employing postcolonial and intersectional lenses this volume will interrogate the historical legacies of colonialism that have intensified ecological degradation The contributors in this volume not only observe the Anthropocene as a narrative but also assess its literary conventions to highlight its inherently fictional framework that shape its representation in literature This volume will engage with the current developments in this field and will try to diversify various other issues

The Cambridge Companion to Environmental Humanities Jeffrey Cohen, Stephanie Foote, 2021-09-02 Offers a comprehensive introduction to the environmental

humanities It addresses the 21st century recognition of an environmental crisis **Posthumanity in the Anthropocene** Esther Muñoz-González, 2023-04-20 In this book Margaret Atwood's dystopian novels *The Handmaid's Tale* the *MaddAddam* trilogy *The Heart Goes Last* and *The Testaments* are analyzed from the perspective provided by the combined views of the construction of the posthuman subject in its interactions with science and technology and the Anthropocene as a cultural field of enquiry Posthumanist critical concerns try to dismantle anthropocentric notions of the human and defend the need for a closer relationship between humanity and the environment Supported by the exemplification of the generic characteristics of the cli fi genre this book discusses the effects of climate change at the individual level and as a collective threat that can lead to a world without us Moreover Margaret Atwood is herself the constant object of extensive academic interest and Posthuman theory is widely taught researched and explored in almost every intellectual field This book is aimed at worldwide readers not only those interested in Margaret Atwood's oeuvre but also those interested in the debate between critical posthumanism and transhumanism together with the ethical implications of living in the Anthropocene era regarding our daily lives and practices It will be especially attractive for academics university teachers postgraduates researchers and college students in general **(Eco)Anxiety in Nuclear Holocaust Fiction and Climate Fiction** Dominika Oramus, 2023-07-07 Eco Anxiety in Nuclear Holocaust Fiction and Climate Fiction Domsday Clock Narratives demonstrates that disaster fiction nuclear holocaust and climate change alike allows us to unearth and anatomise contemporary psychodynamics and enables us to identify pretraumatic stress as the common denominator of seemingly unrelated types of texts These Domsday Clock Narratives argue that earth's demise is soon and certain They are set after some catastrophe and depict people waiting for an even worse catastrophe to come References to geology are particularly important in descriptions of the landscape the emphasis falls on waste and industrial bric a brac which is seen through the eyes of a future posthuman archaeologist Their protagonists have the uncanny feeling that the countdown has already started and they are coping with both traumatic memories and pretraumatic stress Readings of novels by Walter M Miller Nevil Shute John Christopher J G Ballard George Turner Maggie Gee Paolo Bacigalupi Ruth Ozeki and Yoko Tawada demonstrate that the authors are both indebted to a century old tradition and inventively looking for new ways of expressing the pretraumatic stress syndrome common in contemporary society This book is written for an academic audience postgraduates researchers and academics specialising in British Literature American Literature and Science Fiction Studies *Climate Fiction and Cultural Analysis* Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly

relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing. Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots, this book sets out to salvage the term's speculative quality. It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated. Focusing primarily on English and German language fictions, *Climate Fiction and Cultural Analysis* shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms. This book will be of great interest to students and scholars of ecocriticism, the environmental humanities, and literary and culture studies more generally.

Understanding Public Debates Jens Martin Gurr, 2024-06-20. By historicizing and contextualizing them through readings of carefully selected literary texts, literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today, whether on different conceptions of liberty, identity, politics, historical commemoration, challenges of globalization, or responses to climate change. *Understanding Public Debates* presents case studies including Milton's *Paradise Lost*, P. B. Shelley's 1820 Reform essay, Philip Roth's *The Human Stain*, the songwriting of Neil Young, and Edward Young's 1720s *Sea Odes*, recent climate fiction, as well as non-literary conflict narratives. Rather than mining texts for arguments for or against certain positions, this book is interested in how texts stage these debates by means of multiple perspectives, narrative situations, or ambiguities. By suggesting how educators might use literary texts as conversation starters for more rational debates, the volume also contributes to Public Literary Studies. Three important fields are here brought together: 1. the study of societal debates and conflicts and the ways in which they challenge pluralist societies; 2. explorations of the societal functions of literature and of non-literary narratives; and 3. discussions of the role and functions of literary studies. The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates.
