Workable Sisterhood Michele Tracy Berger, 2010-07-28 Workable Sisterhood is an empirical look at sixteen HIV positive women who have a history of drug use conflict with the law or a history of working in the sex trade What makes their experience with the HIV AIDS virus and their political participation different from their counterparts of people with HIV Michele Tracy Berger argues that it is the influence of a phenomenon she labels intersectional stigma a complex process by which women of color already experiencing race class and gender oppression are also labeled judged and given inferior treatment because of their status as drug users sex workers and HIV positive women The work explores the barriers of stigma in relation to political participation and demonstrates how stigma can be effectively challenged and redirected The majority of the women in Berger's book are women of color in particular African Americans and Latinas The study elaborates the process by which these women have become conscious of their social position as HIV positive and politically active as activists advocates or helpers She builds a picture of community based political participation that challenges popular medical and scholarly representations of crack addicted prostitutes and HIV positive women as social problems or victims rather than as agents of social change Berger argues that the women's development of a political identity is directly related to a process called life reconstruction This process includes substance abuse treatment the recognition of gender as a salient factor in their lives and the use of nontraditional political resources
