materials and illustrations that surround the words on a page as well as on the lettering or type in which those words appear. This volume featuring an array of beautiful books from the British Library's collection focuses on the sensory experience of holding these objects in your hands. Each book represents a specific moment in the development of the object from scrolls and bound illuminated manuscripts to paperbacks and formatted digital information. The books range from the seventh century to the present and include examples from China, Japan, Southeast Asia, and the Middle East as well as Europe and North America, with separate features on book traditions in Africa and Oceania. Expert curators and other specialists explore these books from the perspective of design and manufacturing with original art photographs that zero in on their texture and materials as well as graphics that detail their size, number of folios, and other specifications. Offering a wide-ranging look at the creation and use of books, this volume is itself an object of beauty.
