Cli Fi Novel Media Sensation:

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged Cli Fi and Class focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn *The Noah Myth in Twenty-first-century Cli-fi Novels* Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene With the rise of concern about global warming in recent years climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research Flood narratives have become a subsection of cli fi in their own right This book proposes new readings of four recent rewritings of the Noah myth Odds Against Tomorrow by Nathaniel Rich Margaret Atwood's Maddaddam trilogy When the Floods Came by Clare Morrall and The Flood by Maggie Gee Helen E Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years acknowledging important contributions from critics including Adam Trexler Adeline Johns Putra and Astrid Bracke However her book's strength is that it takes a new approach going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene Apocalyptic Visions in the Anthropocene and the Rise of Climate Fiction Kübra Baysal, 2021-08-10 With the increasing interest of pop culture and academia towards environmental

issues which has simultaneously given rise to fiction and artworks dealing with interdisciplinary issues climate change is an undeniable reality of our time In accordance with the severe environmental degradation and health crises today including the COVID 19 pandemic human beings are awakening to this reality through climate fiction cli fi which depicts ways to deal with the anthropogenic transformations on Earth through apocalyptic worlds as displayed in works of literature media and art Appealing to a wide range of readers from NGOs to students this book fills a gap in the fields of literature media and art and sheds light on the inevitable interconnection of humankind with the nonhuman environment through effective descriptions of associable conditions in the works of climate fiction **The Aesthetics of Collective Agency** Simone Knewitz, Stefanie Mueller, 2024-10-30

Twenty first century Western culture is characterized by profound transformations in its forms of collective organization While traditional institutions of Western liberal democracies still wield significant political power new forms of collective agency most visible in progressive social protest movements but also in the global rise of populism have increasingly put pressure on established systems of collective organization The contributors to this volume explore the social political and aesthetic forms that collective agency takes in the twenty first century across a variety of media including social platforms such as TikTok multiplayer video games and contemporary lyric poetry Communicating Science, Climate Change and the Environment in Hybrid Media Mette Marie Roslyng, Anna Rantasila, Anna Maria Jönsson, 2025-05-30 This volume examines how a new hybrid mediascape represents and contributes to the construction of facts and knowledge in relation to science environment and climate controversies providing a new critical perspective to the burgeoning field of science and environment communication Arguing that science must be understood from an inclusive perspective respecting public values and concerns alongside scientific arguments the authors demonstrate how this will allow us to properly understand the role of science truth and factuality alongside the ethical cultural and political concerns about science raised in different publics The chapters focus on the more controversial aspects of science and environmental communication misinformation public understandings of science and the environmental crises vaccination and the role of the hybrid mediascape in science environment and climate conflicts Offering a much needed interdisciplinary approach to understand the role of science of media in science and environment conflicts this book will appeal to students and academics in the areas of media and communication journalism cultural studies science environment and risk communication and digital media studies as well as sociology and political science The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license An electronic version of this book is freely available thanks to the support of libraries working with Knowledge Unlatched KU KU is a collaborative initiative designed to make high quality books Open Access for the public good The Open Access ISBN for this book is 9781003479550 More information about the initiative and links to the Open Access version can be found at www.knowledgeunlatched.org **Imaginative Ecologies**, 2021-12-13 Imaginative Ecologies Inspiring Change through the

Humanities highlights the role literature and visual arts play in fostering sustainability It weaves together contributions by international scholars practitioners and environmental activists whose insights are brought together to illustrate how creative imaginations can inspire change One of the most outstanding characteristic of this volume is its interdisciplinarity and its varied methods of inquiry The field of environmental humanities is discussed together with ideas such as the role of the public intellectual and el buen vivir Examples of ecofiction from the UK the US and Spain are analysed while artistic practices aimed at raising awareness of the effects of the Anthropocene are presented as imaginative ways of reacting against climate change and rampant capitalism

Research Handbook on Communicating Climate Change David C. Holmes, Lucy M. Richardson, 2020-12-25 Drawing together key frameworks and disciplines that illuminate the importance of communication around climate change this Research Handbook offers a vital knowledge base to address the urgency of conveying climate issues to a variety of audiences

Mixed Feelings Douglas Cairns, Pia Campeggiani, 2025-06-02 Affective valence typically refers to the way an affective state feels i e the quality of the dis pleasure we subjectively experience fear usually feels unpleasant while joy feels good Yet sometimes affective experience feels bittersweet i e good and bad at the same time as when we enjoy being scared on the roller coaster or being sad when reading a heart rending novel In these situations mixed affect is experienced as a blended state in which positive and negative aspects cannot be prised apart in any meaningful way But mixed affect can also arise from conflicting emotions e g when we desire something that we also wish to avoid from ambivalence e g when we are of two minds about something and more Taking a cross cultural and multidisciplinary perspective this volume aims to enrich our understanding of the phenomenology of mixed affective experiences It explores narrative representations of mixed emotions in historical and literary works in both Western and Eastern traditions as well as the theorization of such experiences in these traditions It will be of interest to students and scholars of literature especially classical Chinese Greek Indian and Latin history of emotions and philosophy

The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields It offers a new conceptualisation of the field today marking the significant changes that have taken place in sf studies over the past 15 years Building on the pioneering research in the first edition the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print It also updates and expands the range of frameworks that are relevant to the study of science fiction The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context including South Asian Latin American Chinese and African diasporic science fiction The contributors use both well established critical and theoretical approaches and embrace a range of new ones including biopolitics climate crisis critical ethnic studies disability studies energy humanities game studies medical humanities new materialisms and sonic studies This book is an invaluable resource

for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 *Climate Fiction and Cultural Analysis* argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions *Climate Fiction and Cultural Analysis* shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
