The Life Cycle Of Civilizations:

The Life Cycle of Civilizations Stephen Blaha, 2002 This book is an expanded version of The Rhythms of History the book that made macro History into a semi quantitative Science New features include 1 an appendix showing how the history of Mayan civilization conforms to the book s Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas Guatemala 2 an appendix on the sub Saharan African civilization Great Zimbabwe showing it fits the theory 3 a comparison of the theory with Toynbee s observations showing the many new features resulting from a quantitative theory 4 numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century 5 a chapter describing the potentially disturbing implications of patterns in civilizations Are we free and the implications for the Philosophy of History and 6 expanded comments in many sections such as the sections on the future of Humanity the role of China and the Islamic West conflict The book begins with a hard hitting tell it like it is chapter on the current international situation with statements such as The United States and Western civilization is now engaged in a small Vietnam style war on a global scale at the time of this writing This war is still in the early stages of development The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire the First Century AD had for the future of Rome They may be a premonition of things to come not necessarily soon but perhaps in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world s climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise

and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today s civilizations including the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world s civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations

The Rhythms of History Stephen Blaha, 2002-08

The Rhythms of History presents a quantitative theory of civilizations supported by the data in Toynbee s classic 12 volume *A Study of History*

The Shifting Global Balance of Power: Perils of a World War and Preventive Measures Dr. Yana Korobko, Mahmoud Musa, 2014-06-09

Many believed that the world would remain everlastingly unchangeable in the aftermath of victory of the Allies the United States the Soviet Union China United Kingdom and France in World War II They remodeled the world map amongst themselves and affirmed that they will be guarantors of the international status quo However those who pledged to conserve peace are now breaking it leading the planet to the edge of clash This book differs from all others that dealt with possible World War III scenarios since it combines knowledge in the fields of history international relations economics sociology and psychology and philosophy Thus giving the reader a broader outlook on such matters as Potentially risky world war scenarios Dialogue between the West and Islam New emerging superpowers

Psychological and Cyber Warfare Preventive mechanisms such as early warning and preparedness operations

Civilization and Beyond Scott Nearing, 2017-12-02 We may think and talk about civilization as one pattern or level of culture one stage through which human life flows and ebbs In that sense we may regard it abstractly and historically as we regard the most recent ice age or the long and painful record of large scale chattel slavery World System History Robert Allen Denemark, 2000 A vital overview of perspective on the history of the world system for all graduates and researchers in a variety of fields such as international political economy world history and sociology Modern Historical and Social Philosophies Pitirim A. Sorokin, 2020-03-05 Even in normal times cogitation about man's destiny on the whence and whither the how and why of a given society is now and then carried on by at least a few thinkers or scholars In times of serious crisis these problems suddenly assume exceptional importance theoretical as well as practical for thinkers as well as for plain folk An enormous part of the population finds itself uprooted ruined mutilated and annihilated by the crisis People's routine of life is entirely upset their habitual adjustments are broken and large groups of human beings are turned into a flotsam of displaced and disadjusted persons Even the ordinary man in the street cannot help asking How has all this come about what does it all mean who is responsible for it what are its causes is there any way out where do we go from here and what is going to happen to me and my family my friends and my country In a serious crisis these questions press still more intensely upon the thinkers leaders and scholars in a society Many of them do not pay much attention to their sociocultural shoes until they begin to pinch When however the pinching of the hardships of the crisis becomes unbearable they are forced to begin to ponder on the how and why of the crisis and on all the other problems of a painful transitional situation *1982 World History Teaching Conference* Joe C. Dixon, Neil D. Martin, 1983 *Cosmology, Physics and Philosophy* Benjamin Gal-Or, 2013-04-18 by Sir Karl Popper This is a great book and an exciting book I say so even though I happen to disagree with the author in many minor points and one or two major points Some of the minor points are merely terminological and therefore very minor I dislike the term dialectic because of its use since Hegel and Marx and I dislike the term gravitism perhaps without a good reason Thus I dislike the name which Professor Gal Or has given to his theory But the theory seems to me a great and a very beautiful theory so far as I can judge Other minor points of disagreement are connected with Gal Or's original and remarkable views of the great philosophers including Spinoza and Kant A major point of disagreement is that Gal Or following Einstein is a scientific determinist while I cannot but regard determinism as a modern superstition Of course he may be right and I may be completely mistaken I mention these critical points rather in order to emphasize how strongly I am impressed by Professor Gal Or's great book Even in the very unlikely case that wherever we disagree he should be in the wrong and I right even if that should be the case which is improbable in the extreme it would remain a great book readable worth reading and enlightening with a most fascinating cosmological story of time expansion and gravitation

Information Technology and Societal Development Targowski, Andrew, 2008-10-31 Latent in the current environment of

rapid technological advances are breakthroughs waiting to be discovered that will have profound impacts on how organizations will cope with the direction civilization is taking

Information Technology and Societal Development examines in depth the full range of impacts of information technology on civilization and the development of societies Uniquely broad in the scope of examining the societal implications of informational technology this groundbreaking reference work makes an essential contribution to research libraries worldwide

Great Power Conduct and Credibility in World Politics Sergey Smolnikov, 2018-05-04 This book seeks to answer one main question what is the core concern of great powers that streamlines their behavior in the contemporary system of international relations Building on the examples of the United States China Russia France and Britain it tracks both consistency and fluctuations in global power dynamics and great power behavior The author examines the genesis causality and policy implications of decision makers fixation with retaining a credible image of power in world politics while exploring how the dynamics of power distribution in international systems modify perceptions of primacy Drawing on findings from disciplines such as history economics social and political psychology communication theory philosophy political science strategic studies and above all from International Relations theory and practice the volume proposes a novel theory of power credibility which offers an original explanation of great powers behavior at the stage of their relative decline

The Laws of History Graeme Snooks, 2002-09-26 This is an original and controversial reflection on the course of human history and a remarkable attempt to develop a scientific model of laws for the social sciences It considers the nature of laws and the reasons we might expect to find them in history employs an underlying framework concerning societal dynamics historical change and institutional change which are in fact the laws of history This volume consolidates the author's previous research in *The Dynamic Society* and *The Ephemeral Civilization*

Robert Redfield and the Development of American Anthropology Clifford Wilcox, 2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development

Cognitive Informatics and Wisdom Development: Interdisciplinary Approaches Targowski, Andrew, 2010-12-31 Since wisdom is the ultimate human virtue its application is important for humans and civilization Cognitive Informatics and Wisdom Development Interdisciplinary Approaches argues that wise civilization cannot function without wise people and vice versa that wise people cannot function without positive conditions for the development of wise civilization Using the cognitive informatics approach as a basis for the investigation of wisdom this book offers solutions on how to study and evaluate the

state of wisdom in 21st century society and the requirements for wise civilization and its monitoring systems **The Last Civilization** Charles Brough, 2010-11 The terrorism continues with no end in sight over population grows ever more serious our natural resources are being depleted and corruption runs rampant Will these problems ever be solved The continuing events point to an impending breakdown of our civilization The threat of a new world wide plague mass starvation and nuclear war increases each year No solution is in sight without an understanding of social evolutionary natural selection and how it has shaped world affairs throughout both history and prehistory Only by learning how ideology shapes society is it possible to know what must happen in order for people to be active in the transition from the old into a new society and civilization The author covers topics such as our primate small group social behavior the development of the matriarchal agricultural ideological system the ideology involved in barbarism and the rise of the patriarchal monogamous ideologically based societies and their civilizations Learn why the green revolution is falling behind the biologically related build up of stress and how lagging energy supplies will affect the world Two of the last chapters lay out the structural make up of every successful mainstream world view ideological system They use that to build a facsimile of what the core of such a new and advanced system would have to be like to succeed a perpetual lack of which would ensure that this is indeed The Last Civilization because no other can follow without it

The Politics of History Arthur H. Shaffer, 2011-12-31 This is an analysis of the American Revolutionary generation's attempt to create a national history that would justify the Revolution and develop a sense of nationhood Shaffer pursues a number of themes and establishes a connection between the historians republican ideology political concerns and outlook and the precise ways in which they interpreted American history He also includes an analysis of their background education profession political persuasion personal ambitions and circumstances and attitudes toward the problem of union during the 1780s The writings here offer unusual insights into the mind of the Revolutionary generation The histories produced during the early national period represent the beginnings of a genre of writing new to America one characterized by the subjugation of history to the service of nationalism It is this element nationalism that gave this history its flavor made possible its achievement saddled it with difficulties and although unintentionally produced a tone and emphasis different from that of the Enlightenment The contribution of the Revolutionary generation of historians to the public identity represents an important aspect of the intellectual history of the early national period With all their frequent vagueness and imprecision of formulation almost incantatory repetitiousness and patriotic sentimentality the works of the first national generation of historians comprise a revealing effort to come to grips with the meaning of the Revolution and nationhood This striving charted much of the course that American historiography was to travel thereafter

The Socio-Intellectual Foundations of Malek Bennabi's Approach to Civilization Badrane Benlahcene, 2011-01-01 Since the publication of Samuel Huntington's The Clash of Civilizations concern about civilization has been reintroduced into the debate on the world order Malek Bennabi 1905-1973 prominent Algerian thinker and great

Muslim intellectual intently focused on unraveling the causes of Muslim decline and the success of Western civilization and culture The key problem he theorized lay not in the Qur an or Islamic faith but in Muslims themselves The author investigates Bennabi s approach to civilization and the fundamental principles drawn using metatheorizing methodology In doing so he sheds further light on perhaps one of the more intriguing elements of Bennabi s theory that civilization is governed by internal external and social intellectual factors and that an equation can be generated for civilization itself This equation of Man Soil Time Civilization and of which religion according to Bennabi forms the all important catalyst is explained and its significance in terms of the reversal of Muslim decline evaluated What is clearly apparent is that for Bennabi Man is the central force in any civilizing process and without him the other two elements are of no value With regard to outcomes Bennabi s unerring conviction that unless Muslims changed their spiritual condition they could not affect any far reaching meaningful change in society is echoed in the Qur anic verse Verily never will Allah change the condition of a people until they change what is in themselves 13 11 Civilization: Contents, Discontents, and Malcontents and Other Essays (c) Stanford M. Lyman,1990 *Understanding Sarkar* Sohail Inayatullah,2019-11-11 Sohail Inayatullah takes us on a journey through Indian philosophy grand theory and macrohistory We understand and appreciate Indian theories of history specifically cyclical and spiral theories of time From other civilizations we learn how seminal thinkers understood the stages and mechanisms of transformation Ssu Ma Chien Ibn Khaldun Giambattista Vico George Wilhelm Friedrich Hegel Oswald Spengler Comte Pitirim Sorokin and Michel Foucault are invited to a dialog on the nature of agency and structure and the escape ways from the patterns of history But the journey is centered on P R Sarkar the controversial Indian philosopher guru and activist While Sarkar passed away in 1990 his work his social movements his vision of the future remains ever alive Inayatullah brings us closer to the heart and head of this giant luminary Through Understanding Sarkar we gain insight into how knowledge can transform and liberate This publication has also been published in paperback please click here for details

Pause for Transition Bart Landheer,2012-12-06 The idea of the present study is basically a simple one It attempts to reconcile the concept of social evolution with that of the structural unity of Man an idea that is becoming increasingly dominant in the exact as well as in the social sciences The idea of structure as it emerges from the social field is applied to the human mind as the ultimate cause of society While pragmatism interpreted the mind as reacting as a whole the concept of structure places the relation of Man versus his Environment in a different light and attempts to determine the possible limits of social development These problems are analyzed in a number of introductory chapters while the basic approach is illustrated by an analysis of some aspects of the growth of Western civilization Some fictitious case studies have been added in order to leave room for an imaginative interpretation which sometimes can bring out points which are more difficult to explain in objective language **Civilizations and World Systems** Stephen K. Sanderson,1995 Leading figures in the fields of civilizational studies and sociology and political science join to compare and contrast their assumptions and

conclusions about broad scale social and historical change
