System Theory In Geomorphology Challenges Epistemological Consequences And Practical Implications Springer Theses:

System Theory in Geomorphology Kirsten von Elverfeldt, 2012-03-12 Empirical research needs a profound theory to be successful This is the simple but in its consequences radical approach for this study in geomorphology It critically analyses the current system understanding and offers a new view for a geomorphology that understands systems as being open but at the same time operationally closed as self organized structure building and potentially self referential Kirsten von Elverfeldt succeeds in designing a theoretical framework that sets new standards within Physical Geography By using state of the art concepts in system theory it offers also new bridges to Human Geography as well as to other neighbouring disciplines This book was awarded the Dissertation prize 2010 of the German Working Group in Geomorphology of the DGfG and the Hans Bobek prize of the GG Austrian Geographical Society

Quaternary Environmental Change in Southern Africa Jasper Knight, Stefan W. Grab, 2016-06-23 Ongoing climate change necessitates advances in our understanding of the interrelationships between climate landscape shaping processes and human activity over long time periods especially in areas that are already climatically stressed This volume presents new ideas on macroscale landscape evolution mountain fluvial and aeolian processes and environments in southern Africa a key region in the story of human evolution during the last two million years Interdisciplinary in scope it brings together an international team of experts to synthesise the latest research and understanding of landscape human relationships in this region It incorporates results from the emerging fields of geoarchaeology and cultural landscapes and utilises the latest data and analytical techniques A key reference for researchers studying hominid evolution geoarchaeology and environmental change it provides a benchmark study of southern African landscape evolution during the Quaternary It will also appeal to professionals and policymakers with interests in future human landscape evolution in southern Africa

Brazilian Geography Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality Against this backdrop the geography of the country has developed by integrating relating to and forming part of those realities as it headed out into the streets Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory This book thus covers the theoretical approaches in Brazilian geography its different lines of research and above all its character as manifested in culture and society

Grey Systems Sifeng Liu, Jeffrey Yi Lin Forrest, 2010-12-15 Due to inherent limitations in human sensing organs most data collected for various purposes contain uncertainties Even at the rare occasions when accurate data are available the truthful predictions derived on the data tend to create chaotic consequences

So to effectively process and make sense out of available data we need methods to deal with uncertainty inherently existing inside the data The intent of this monograph is to explore the fundamental theory methods and techniques of practical application of grey systems theory initiated by Professor Deng Julong in 1982 This volume presents most of the recent advances of the theory accomplished by scholars from around the world From studying this book the reader will not only acquire an overall knowledge of this new theory but also be able to follow the most current research activities All examples presented are based on practical applications of the theory when urgent real life problems had to be addressed Last but not the least this book concludes with three appendices The first one compares grey systems theory and interval analysis while revealing the fact that interval analysis is a part of grey mathematics The second appendix presents an array of different approaches of studying uncertainties And the last appendix shows how uncertainties appear using general systems approach
