ABBA: An Agent-Based Model of the Banking System Mr.Jorge A Chan-Lau,2017-06-09 A thorough analysis of risks in the banking system requires incorporating banks inherent heterogeneity and adaptive behavior in response to shocks and changes in business conditions and the regulatory environment ABBA is an agent based model for analyzing risks in the banking system in which banks business decisions drive the endogenous formation of interbank networks ABBA allows for a rich menu of banks decisions contingent on banks balance sheet and capital position including dividend payment rules credit expansion and dynamic balance sheet adjustment via risk weight optimization The platform serves to illustrate the effect of changes on regulatory requirements on solvency liquidity and interconnectedness risk It could also constitute a basic building block for further development of large bottom up agent based macro financial models

THE FABRIC OF DIGITAL AUTONOMY Rethinking Decision Systems in Modern Financial Networks and Intelligent Infrastructure Avinash Pamisetty , *Law and Regulation of Mobile Payment Systems* Joy Malala,2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya

The Institutional Structure of Macroprudential Policy in the UK Kosmas Kaprinis,2023-06-28 Macroprudential policy MPP has been one of the major initiatives in the post 2008 crisis restructuring of financial regulation Under the macroprudential mandate the regulator monitors and judiciously controls systemic risk in the financial system in an attempt to minimise the probability and severity of a future financial crisis The book reveals why MPP authorities are rightfully at the centre of a highly sensitive policy debate as MPP necessitates the allocation of significant regulatory power to technocrats while the highly technical nature of MPP makes policy evaluation challenging Specific issues examined include the importance of financial stability as a public policy goal the political economy

issues stemming from the delegation of MPP to an independent authority and the definition of accountability in the context of MPP Focusing on a case study on the Financial Policy Committee of the Bank of England the macroprudential authority in the UK the book develops the normative grounds to justify the need for accountability in the conduct of MPP while also formulating the necessary institutional framework to ensure the accountability of MPP authorities

An Introduction to Socio-Finance Jørgen Vitting Andersen, Andrzej Nowak, 2013-12-11 This introductory text is devoted to exposing the underlying nature of price formation in financial markets as a predominantly sociological phenomenon that relates individual decision making to emergent and co evolving social and financial structures Two different levels of this sociological influence are considered First we examine how price formation results from the social dynamics of interacting individuals where interaction occurs either through the price or by direct communication Then the same processes are revisited and examined at the level of larger groups of individuals In this book models of both levels of socio finance are presented and it is shown in particular how complexity theory provides the conceptual and methodological tools needed to understand and describe such phenomena Accordingly readers are first given a broad introduction to the standard economic theory of rational financial markets and will come to understand its shortcomings with the help of concrete examples Complexity theory is then introduced in order to properly account for behavioral decision making and match the observed market dynamics This book is conceived as a primer for newcomers to the field as well as for practitioners seeking new insights into the field of complexity science applied to socio economic systems in general and financial markets and price formation in particular
