Textbook of Interdisciplinary Pediatric Palliative Care E-Book Joanne Wolfe, Pamela Hinds, Barbara Sourkes, 2011-01-26 The Textbook of Interdisciplinary Pediatric Palliative Care by Drs Joanne Wolfe Pamela Hinds and Barbara Sourkes aims to inform interdisciplinary teams about palliative care of children with life threatening illness It addresses critical domains such as language and communication symptoms and quality of life and the spectrum of life threatening illnesses in great depth This comprehensive product takes a first of its kind team approach to the unique needs of critically ill children It shows how a collaborative interdisciplinary care strategy benefits patients and their families If you deal with the complex care of critically ill children this reference provides a uniquely integrated perspective on complete and effective care Respect interdisciplinary perspectives and provide the most comprehensive care Use an integrated approach to address the physical psychological social and spiritual needs of children and their families Understand and heed your strengths and vulnerabilities in order to provide the best care for your patients Recognize the necessity of linking hospital based palliative care with community resources Implement consistent terminology for use by the entire palliative care team Access the full text online

with regular updates and supplemental text and image resources **Being a Doctor** Hamish Wilson, Wayne Cunningham, 2014-09-20 Being a Doctor is much more than simply providing medical care This book aims to increase the resilience and wellness of doctors helping the profession to provide better care for patients through a deep and thoughtful approach to clinical work It explores areas that can challenge clinicians in all stages of their career the doctor patient relationship adverse outcomes the heartsink experience and functional illness The authors also introduce self care of the doctor and patient safety two important issues for modern medicine This is a unique text that draws links between the philosophy of modern medicine and clinical tasks such as consulting skills the doctor patient relationship patient safety reflective practice and doctors self care It is written in an accessible style and is firmly grounded in real life clinical and teaching experience The authors believe each doctor as a person is inseparable from the task of delivering medical care Enhancing our ability to deliver that care is essential for patients communities and society Just as patients need whole person care the profession needs whole person doctors Being a doctor and deriving meaning from clinical experience are at the heart of this book Vital Statistics, Special Reports ,1936 **National Summaries** United States. National Office of Vital Statistics, 1954 Cancer Treatment Reports ,1987 Diagnosis and Treatment of Aortic Diseases C.A. Nienaber, R. Fattori, 2012-12-06 This book is an up to date summary of all aspects of aortic disease written by international experts in their fields covering diagnostic concepts of all aortic diseases the most modern therapeutic approaches in various aortic syndromes the pathogenic origin and the most recent molecular and cellular findings that have revolutionized our present knowledge of aortic diseases The reader will come to understand the aorta as a functional organ with a complex regulatory system rather than just a major arterial vessel and will have a better understanding of the prognostic impact of various aortic syndromes and of the most recent therapeutic concepts for chronic as well as acute aortic pathology As a unique feature of this book the aorta is placed in the center of systemic illnesses such as atherosclerosis diabetes hypertension infectious diseases and connective tissue disorders storage diseases trauma and toxic factors this concept aims to attract the attention of both clinical specialties such as cardiology radiology and cardiovascular surgery and adjacent areas like pathology and clinical genetics The book portrays the aorta as an integral part of the cardiovascular system and the entire organism and features the complexity and clinical impact of all major aortic diseases Cancer: How Worthwhile is Non-Curative Treatment? Maurice L. Slevin, Teresa Tate, 2012-12-06 Cancer is a major issue in the provision of health care It is estimated that one in four people in developed countries are likely to develop it at some time As longevity steadily increases the incidence of malignant disease is expected to rise further Important advances in the control of cancer have taken place and curative treatment has improved notably in some of the rarer tumours particularly in children Advances in the more common cancers have been less marked although adjunctive systemic treatment and population screening are lowering mortality from the most prevalent cancer carcinoma of the breast Despite this progress complete control of malignant disease is still a long

way off However our understanding of the molecular biology of cancer has increased enormously in recent years and the application of this knowledge holds considerable promise for developing new therapeutic strategies As for prevention the cause of most cancers is still poorly understood although it is clear that tobacco avoidance would prevent most lung cancers and several others Cancer is studied at many different levels molecular and cellular biology pathology in patients particularly clinical trials and prevention and populations epidemiology The psychosocial problems caused to patients and their families are being increasingly recognized and subjected to systematic study Workers in the field therefore range from basic scientists to epidemiologists from hospital specialists to community support teams Each needs to have at least some knowledge of the role the others play
