

T-Mobile MDA Troubleshooting

Problem	Solution
Power and Battery	
I cannot turn on my device.	Soft reset the device with the stylus. Connect your device to the AC adapter and check LED indicator whether device is charging. It is possible that the battery is drained off.
My device keeps turning itself off.	Your device is designed by default to turn itself off if not used for three minutes. This period can be adjusted to a maximum of five minutes. Refer to the Power setting in the manual for more information.
My device's date and time reset to factory default if I have removed or replaced battery.	Always re-attach the battery immediately during replacement. The data will be lost if the battery is removed for a long time.
Why does my device power reduce faster than my friend's?	Battery consumption varies from user to user due to the way it is being used. Devices set under specific identical test conditions may be compared objectively.
ActiveSync	
ActiveSync operation cannot be performed or connected.	Make sure you have correctly installed the ActiveSync software found on the Getting Started disk that came with your device and have followed the instructions accordingly. Restart your device or/and PC and try again. DO NOT plug in the USB cable before loading ActiveSync. Make sure the ActiveSync cradle/cable is connected securely. On you PC, make sure the Connection Settings are correctly selected in File > Connection Settings of Microsoft ActiveSync. Ensure that Modem Link is deactivated as well.
ActiveSync is connected, but I can not transfer data.	Make sure your have established a Partnership with the PC, and check Tools > Options of Microsoft ActiveSync on your PC, to see if the information type you want has been selected for synchronizing. For more information, refer to Chapter 4.
Display and Sound	
Screen freezes or no response.	Soft reset your device by pressing Reset button with the stylus.
