Applications of Computational Learning and IoT in Smart Road Transportation System Saurav Mallik,Hong Qin,Subrata Nandi,Munshi Yusuf Alam,Arup Roy,Tanvir Habib Sardar,2025-05-08 This book discusses machine learning and AI in real time image processing for road transportation and traffic management There is a growing need for affordable solutions that make use of cutting edge technology like artificial intelligence AI machine learning ML and the Internet of Things IoT The efficiency sustainability and safety of transport networks can be greatly increased by implementing an Internet of Things IoT and machine learning ML based smart road transport system Install sensors on roadways and intersections to gather data on traffic conditions in real time such as vehicle density speed and flow Predicting traffic patterns is done by analyzing the gathered data using machine learning algorithms This can lessen traffic enhance overall traffic management and optimize

traffic signal timings Vehicles equipped with Internet of Things devices can have their health monitored in real time Parameters including lane changes brake condition tire pressure and engine performance can all be monitored by sensors Based on the gathered data ML models are used to forecast probable maintenance problems By scheduling preventive maintenance failures can be avoided and overall road safety can be increased Create a smartphone app that would enable drivers to locate parking spots in their area To forecast parking availability based on past data the time of day and special events apply machine learning algorithms Integrate Internet of Things IoT sensors into fleet vehicles to monitor their performance location and fuel consumption To maximize fleet efficiency reduce fuel consumption and plan routes more effectively apply machine learning algorithms Train ML models to forecast the quickest and most efficient routes with the help of historical data analysis Route recommendations for drivers or fleet management systems can be constantly adjusted with real time updates which contain real time data on road conditions accidents and construction To guarantee smooth integration and efficient implementation government organizations transportation providers and technology firms must work together
