FIG. 1. A schematic diagram of the experimental setup. The subject is seated in a chair, viewing a video screen. The screen displays a target (a small circle) and a starting point (a larger circle). The subject's hand is positioned at the starting point. The distance between the starting point and the target is indicated by a horizontal line. The subject is instructed to move their hand from the starting point to the target. The video screen is connected to a computer system, which records the subject's hand position and movement time.
