Reeves,2015-11-06 By 1807 Napoleon's victories over his European adversaries were legendary. His Grand Army had defeated the greatest European armies of the period. Each army in succession from the Hapsburg Empire to Russia had been soundly beaten and had not been able to come to grips with how to deal with his lightning style of warfare. Yet over a six year period from 1807 to 1813 in the backwater Iberian Peninsula, Napoleon lost both his prestige and more troops than he lost in the infamous wintry campaign in Russia. How did an army of bandits, priests and commoners along with a small expeditionary force achieve victory over the most powerful armies on the continent? The answer lies in that Napoleon did not only fight a band of insurgents and a small British led coalition army but he also suffered from a combination of poor morale, weak leadership and a refusal to fully recognize the enemy situation. His overextended lines of communications covered an area that was bleak and poor in resources and he could no longer rely on foraging to feed and supply his troops; many of them suffering from starvation. The Iberian Campaign cost Napoleon over 250,000 troops and drained the French of manpower and resources that could have been used elsewhere. The campaign bankrupted Napoleon's image of invincibility and sapped his army's leadership and experience. Therefore, Napoleon would have to rely on more conscripts and an ever increasing number of foreign troops to fill his depleted ranks. Napoleon's generals were entangled in a politico-military quagmire for which they were never prepared and for which they received little guidance. The Peninsular Campaign sucked the lifeblood of Napoleon's armies and they were never able to fully recover from it.

The Command And Control Of The Grand Armée: Napoleon As Organizational Designer Lieut. Norman L. Durham,2015-11-06 The purpose of this thesis is to investigate Napoleon Bonaparte's command and control of the Grand Armée through the lens of organizational design. Napoleon's methodology behind the design of the Grand Armée is analyzed using modern principles of organizational design. The structure that Napoleon created within his organizational design was a vast information network that served as the framework for a highly effective command and control system. This command and control network allowed Napoleon to dominate a war with his enemies within the information domain. The Grand Armée transited the European countryside with lightning speed as Napoleon outmaneuvered his enemies. Napoleon's dominance was a direct result of his organizational masterpiece that was the Grand Armée. From an organizational design perspective, Napoleon's methodology applied the ideas of others and exploited existing technology to affect his design. The reorganization of the military corps became one of the most important transformations made by Napoleon. The army corps was considered a key component in Napoleon's strategic deployments. The command and control system he engineered for his corps was essential in the Napoleonic philosophy to march divided and fight united.
