Switzerland and South Africa 1948-1994 Georg Kreis, 2007 While other states imposed economic sanctions on the apartheid regime of South Africa Swiss authorities long adhered to the position that South Africa is a state like any other Swiss big business corporations saw an attractive trade partner in South Africa in part they also profited from the boycotts of others Additionally some political forces sympathised openly with the regime in Pretoria Encouraged by the debate concerning Swiss policy and activity during the Second World War in 1997 the order was given to initiate a historical study of Swiss behaviour towards the apartheid regime Thus this report commissioned by the Swiss parliament and the Federal Council and passed over to the Swiss National Science Foundation for execution came into being It unites the results of ten different research projects The report identifies the most important players involved in fashioning relations with South Africa it explains the legal situation in which these

persons acted and it describes the thought processes that led to the actions The longest chapter deals with the attitudes and the areas of activity in the economic sector Here the trade with loans gold diamonds and war materials is paramount Other chapters are concerned with questions that are not primarily economic in nature such as political declarations the illusion of being in the role of a mediator contacts in sports and culture and after 1986 the beginning of support for the black majority

Switzerland in Europe Christine Trampusch, André Mach, 2011-03-14 The book provides the first systematic overview of Swiss political economy in comparative perspective It provides an analysis of major socio economic institutions economic actors economic and social policies and political institutions and their recent changes OECD Economic Surveys: Switzerland 2003 OECD, 2004-01-30 OECD's 2003 Economic Survey of Switzerland examines recent economic developments policies and prospects The special feature covers product market competition and economic performance **Inventing the German Nation in Travel Literature, 1738-1839** Karin Baumgartner, 2025 Far into the nineteenth century Germany was not yet a nation state but a conglomeration of principalities The causes and consequences of its belatedness compared to other European countries such as England and France have been much debated The present book breaks new ground by identifying travel literature as an important factor in the forging of a distinct and cohesive German identity well before political unification in 1871 First foreign travelers accounts travelogues guidebooks referred to and treated Germany as a distinct place even though it was still politically divided thus enabling German readers to imagine their fragmented nation as a conceptual whole Second Germans themselves began to explore their homeland and write travelogues that solidified the nascent sense of national identity Ethnographic descriptions from places and peoples far away further aided this process as Germans learned to view themselves through this particular lens Surveying a large corpus of German and some British and French travelogues travel handbooks and popular geographic texts and bringing to bear discourses of nationalism and geography including Edward Soja's seminal concept of Thirdspace Karin Baumgartner reveals what travel writing can tell us about conceptual changes in geographic paradigms and national identity in Germany in the eighteenth and nineteenth centuries A Satchel Guide for the Vacation Tourist in Europe, 1879 A Compact itinerary of the British isles Belgium and Holland Germany and the Rhine Switzerland France Austria and Italy
