T 34/76 Medium Tank 1941-45 New Vanguard:

T-34/76 Medium Tank 1941-45 Steven J. Zaloga, 2013-08-20 The T 34 was the most influential tank design of World War 2 When first introduced into combat in the summer of 1941 it represented a revolutionary leap forward in tank design Its firepower armour protection and mobility were superior to that of any other medium tank of the period This superiority did not last long While the T 34 underwent a series of incremental improvements during 1943 it was being surpassed by new German tank designs most notably the Panther This compact illustrated guide traces the life of the original T 34 through all its difficulties to eventual success T-34/76 Medium Tank Steven Zaloga, 1995 SOVIET ARMoured FORCE ,

Russian and Soviet Tanks 1914-1941 Maximino Argüelles Martinez, 2014-02-17 About the evolution of the Soviet offensive doctrine during World War II Where did this doctrine and armored formations that takes practice arise Why was the USSR as a nation which in 1940 developed a tank as advanced as the T 34 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22 1941 **Tank Gun Systems** William Andrews, 2023-06-30 Much has been written about the

use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system Fighting Tigers in Italy Jeffrey Plowman, 2025-09-30 Examines the feared German Tiger tank its strengths and weaknesses and Allied encounters from North Africa to Italy Of all the tanks in the German arsenal the Tiger was perhaps the one most feared certainly by the Western Allies from the time they first encountered it in North Africa to the end of the war in Europe This was no small feat for a tank of which only 1 347 were produced out of a total German tank production of around 27 000 tanks This is not surprising given that it was armed with the dreaded 88 mm gun the rounds of which could pass right through a Sherman tank and whose thick frontal armour meant that it was virtually invulnerable to anything the Allies could field at that time Though a fearsome weapon on the surface the Tiger was not well suited to offensive operations It suffered from a weak transmission which often failed The lack of suitable

recovery vehicles until the Bergepanther made its appearance meant the crews would often attempt to tow it with another Tiger rather than abandon it. This usually resulted in the loss of both Tigers as the towing tank also broke down through mechanical failure brought about by the extra strain imposed on the towing vehicle. However as a defensive weapon it was second to none especially in Italy. Here the country's hilly terrain with its scattering of small villages restricted the routes of advance the Allies could take. Just the knowledge that Tigers were in the area imposed an extra caution on Allied tank crews particularly after their duels with its lighter Panzer cousins. Starting at the Anzio amphibious landings in January 1944 and finishing with the Senio offensive in 1945 the book draws on official histories, unit diaries, reports and personal accounts to look at encounters between Tigers and sometimes the Elephant based on the hull of its cousin the Porsche Tiger. In this way it seeks to examine how the crews of Allied armour leaned to deal with this menace and sometimes failed to do so to their chagrin. To illustrate this the narrative delves into a number of detailed accounts of some significant encounters at Anzio in Tuscany and on the plains of the Po Valley.

Ju 87D/G STUKA Versus T-34 Robert Forsyth, 2023-09-26. An examination of two of the most high profile air and land weapons to be deployed on the Eastern Front in World War II. In late 1942 as part of its attempts to strike back at ever increasing numbers of Soviet tanks the German air ministry authorised the development of an adaptation and enhancement of the longspan Junkers Ju 87D 5 Stuka dive bomber. The aircraft was duly fitted with two underwing pods containing 37 mm BK cannon, an anti-aircraft cannon with its origins dating back to 1933. The solid slow Ju 87 airframe offered the Luftwaffe an ideal platform for specialist low level tank killing operations. Despite the wealth of experience possessed by some of the Luftwaffe's ground attack and dive bomber aces knocking out T 34 tanks from the air was a demanding and difficult process. Nevertheless some Luftwaffe pilots notched up impressive tank scores and the Ju 87 is credited with the destruction of more than 100 tanks across the central and southern sectors of the Eastern Front including during the Battle of Kursk. Including personal accounts from Stuka pilots and biographies of the anti-tank aces together with detailed photographs of the cannon installation into the Ju 87G and details of the construction of the T 34 illustrated using specially commissioned artwork this book covers the epic clash of two legendary machines of World War II.

Soviet Tanks at Kursk 1943 William E. Hiestand, 2024-12-19. Illustrated throughout this book explains the composition and qualities of the Soviet tank force that fought Germany's mighty Panzers at the biggest tank battle in history. In the summer of 1943 Hitler's army had rebuilt its Panzer forces after defeat at Stalingrad and retreat from the Caucasus. New types including the Panther, Tiger and Elephant at last added technical superiority to the traditional tactical edge enjoyed by the Panzer divisions. The plan was to begin offensive operations by striking from the north and south to cut off Soviet forces in the Kursk salient. In this book Soviet military specialist William E. Hiestand explores the armor that met this Panzer force in the biggest tank battle of World War II. The Soviets had benefited from their prodigious production capabilities but the tanks at Kursk varied widely. Still short of tanks the Soviets also still operated weak T 60 and T 70 light tanks along with the increasingly obsolete KV 1.

heavy tank Significant numbers of Lend Lease tanks also fought including M3 Lees Valentines Stuarts Churchills and the first Shermans to join the Red Army The Soviets also benefited from the firepower of the first generation of Soviet self propelled guns the SU 76 SU 122 and SU 152 With meticulously researched tank illustrations and rare archive photos this is an expert account of the Soviet tank forces in the climactic clash on the Eastern Front **ARMA ACORAZADA SOVIÉTICA** ,

Jagdpanther vs SU-100 David R. Higgins, 2014-04-20 Featuring specially commissioned full colour artwork this engaging study casts new light on the background and details of this clash between two turretless tank destroyers as the two sides contested Hungary's vital oil resources in March 1945 As World War II in Europe reached its end armour development and doctrine had experienced several years of massively accelerated change especially within the crucible of the Eastern Front The German Jagdpanther and Soviet SU 100 both turretless tank destroyer designs based on a traditional turret tank chassis were the culminating examples of how the progression of experience resources and time constraints produced vehicles that were well suited for roles of defence and offence respectively As this compact book details the Jagdpanther represented a well balanced solution and an excellent use of limited resources while the SU 100 was a natural progression of the SU 85 where numbers produced compensated for rudimentary construction poor crew comfort and limited optics
