Youth Digital Health and Online Platforms Martyna Gliniecka, 2024-12-27 Youth Digital Health and Online Platforms

focuses on young people's use of the digital platform Reddit for health. Drawing upon dialogism theory, the book explores how young people produce a youth-led discourse of youth digital health, different from the adult-led framing represented in youth digital health research policy and service delivery. Peer-led discussions online remain one of the controversial forms of youth digital health, associated with negative peer influence or casual teenage talk. This book argues that online peer-led dialogues support young people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th-century Russian philosopher Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people, meanings and opinions. It is constructed around three relational elements: socio-material affordances, creative practices and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian and egalitarian nature supports the emergence of this youth-led discourse. The book can interest scholars and lecturers in childhood and youth studies, Internet studies and youth health studies. Professionals such as policymakers, service designers, deliverers, online safety educators and global youth and health agencies can use evidence-based insights in their work with young people.

Virtue in Virtual Spaces Louisa Conwill, Megan Levis, Walter Scheirer, 2024-09-15. Explore new modes of creation to bring virtue back into virtual spaces. At its best, the internet channels the world into a global village of sorts where digital citizens learn from each other, explore new modes of creation and help others work through dilemmas in both physical and virtual spaces. *Virtue in Virtual Spaces* argues that the internet doesn't have to be the cultural wasteland of click-bait, partisan politics and vulgar content that we see too often today. Technology has tremendous potential for good because of the inherent goodness of human creation and creativity, which can be achieved through the development and use of technology. The authors draw from writing on virtue ethics and Catholic Social Teaching to demonstrate this potential goodness of technology. Eight of the main themes of Catholic Social Teaching are used to build a framework for designing technology to promote human flourishing. In this book, readers will engage with the philosophies behind their favorite social media platforms, examine how the design features in these platforms shape habits and imagination, and gain dialogue-based skills to bring virtue back into virtual spaces.
