Science Fiction and the Historical Novel Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches *Science Fiction and the Historical Novel* asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present

Brazilian Science Fiction M. Elizabeth Ginway, 2004 Science fiction because of its links to science and technology is the consummate literary vehicle for examining the perception and cultural impact of the modernization process in Brazil Because of the centrality of the role played by the military dictatorship 1964 85 in imposing industrialization and economic development policies on Brazil this book examines the genre in the periods before during and after the dictatorship encompassing the years 1960 2000 The analysis shows that a reading of Brazilian science fiction based on its use of paradigms of Anglo American science fiction and myths of Brazilian nationhood provides a unique look into Brazil's modern metamorphosis as it finds itself on the periphery of the globalized world *We (A Dystopian Science Fiction Classic) - The Unabridged Original 1924 Edition* Yevgeny Zamyatin, 2024-01-05 *We* is a dystopian novel which is set in a dystopian future police state D 503 lives in the One State an urban nation constructed almost entirely of glass which allows the secret police spies to inform on and supervise the public more easily The structure of the state is analogous to the prison design concept developed by Jeremy Bentham commonly referred to as the Panopticon Furthermore life is organized to promote maximum productive efficiency along the lines of the system advocated by the hugely influential F W Taylor People march in step with each other and wear identical clothing There is no way of referring to people save by their given numbers Males have odd numbers prefixed by consonants females have even numbers prefixed by vowels Along with Jack London's *The Iron Heel* *We* is generally considered to be the grandfather of the satirical futuristic dystopia genre Yevgeny Zamyatin 1884 1937 was a Russian author of science fiction and political satire Due to his use of literature to criticize Soviet society Zamyatin has been referred to as one of the first Soviet dissidents *Environments in Science Fiction* Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question How do spaces in science

fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two
