Cultures in Human-Computer Interaction Sergio Sayago,2023-04-25 This book provides an interdisciplinary synthesis of the topic of culture in the context of Human Computer Interaction HCI and a structured overview of a large body of HCI research on and with culture The book presents a short and guided overview of the concept of culture It offers some background on the origin and development of the term culture It also outlines some of its key traits and ingredients and summarizes three main perspectives of culture across disciplines The book argues that culture matters considerably in HCI and discusses a number of reasons for and against its relevance Arguments against include a lack of a universal or common definition of the term culture and globalization Arguments in favor touch upon important aspects of HCI including a diversely growing user base the need to provide designers with enough support to design across cultures and the inseparable relationship between culture and technology The issues explored in this book can be classified into three non mutually exclusive categories theoretical practical and controversial The book outlines the main conceptual perspectives of culture within HCI including Geert Hofstede s cultural dimensions theory Edward T Hall s cross cultural theory of communication and Richard Nisbett s cultural cognitive systems

of thought as well as examining the ways in which culture has been operationalized in HCI research and the main functions of culture in this area. It closes with a discussion of some open issues intended to spark debate and future research. The literature this book draws upon covers a wide range of research disciplines including Anthropology, Sociology, Cultural Studies, Robotics, Disability Studies, Cultural and Cross Cultural Psychology, Usability and Design. This book aspires to provide a useful overview of culture for HCI scholars at all levels.

Transforming Special Education Through Artificial Intelligence Walters, Annette G., 2024-10-25. Special education encounters distinct challenges in delivering personalized and practical assistance to students with disabilities. Educators frequently require support to address the varied needs of these students, resulting in learning and development gaps. Moreover, early identification and catering to these needs can take time and effort, affecting students' long-term academic success. There is an urgent need for innovative solutions that can bridge these gaps and improve the educational experiences of students with disabilities. *Transforming Special Education Through Artificial Intelligence* offers a comprehensive exploration of how Artificial Intelligence (AI) can transform special education by providing personalized and individualized support for students with disabilities. Through case studies and real-life examples, we demonstrate how AI can analyze data to tailor learning experiences and most importantly, identify learning difficulties early. This crucial aspect of AI can significantly enhance communication among stakeholders and reassure them about the potential of AI in improving educational outcomes for students with disabilities.
