second reason for writing the book was the need to fill a gap in academics and research. While many excellent books, documents and articles exist for innovative practices, we have not found a work in which we can properly understand the content that the researcher needs to understand. So after much deliberation, we decided to collect all quality efforts in one string. At the most basic level, this book is trying to show research scholars what science, technology and innovations are all about. It cannot study or gain knowledge of that part and is at a level that most researchers should find clear and understandable. Our goal was to develop content that will help researchers who are beginning to use innovative practices. We hope to meet the needs of academicians, research scholars who are being encouraged to incorporate more reading and writing in the field of science and technology. In summary, this book is targeted to the needs of individuals engaged in quality research activities in science and technology. Our goal is to present the topics of creativity and innovation to this audience in a way that enables them to incorporate new skills into their daily work. We would like to thank all the contributors who have made the production of this book so fascinating and enjoyable. Their scholarship and dedicated commitment and motivation to getting it right are the keys to the book's quality, and we greatly appreciate their good nature over many months in the face of our editorial demands and time limits. We are also grateful for using their texts, ideas and critical remarks. We would also like to thank Prof. Dr. Nilam N. Ghuge, Prof. Dr. D. Ayub Khan Dawood, Prof. Dr. Vilas A. Pharande, all reviewers and all authors for their help in consolidating the interdisciplinary of the book. We are grateful to all the 18 institutions for their support. It will not be possible to bring out this edition.

Race Lessons Prentice T. Chandler, Todd S. Hawley, 2017-05-01. We hold that the mission of social studies is not attainable without attention to the ways in which race and racism play out in society past, present and future. In a follow-up to the book *Doing Race in Social Studies* (2015), this new volume addresses practical considerations of teaching about race within the context of history, geography, government, economics and the behavioral sciences. *Race Lessons: Using Inquiry to Teach About Race in Social Studies* addresses the space between the theoretical and the practical and provides teachers and teacher educators with concrete lesson ideas for how to engage learners with social studies content and race. Oftentimes social studies teachers do not teach about race because of several factors: teacher fear

personal notions of colorblindness and attachment to multicultural narratives that stress assimilation This volume will begin to help teachers and teacher educators start the conversation around realistic and practical race pedagogy The chapters included in this volume are written by prominent social studies scholars and classroom teachers This work is unique in that it represents an attempt to use Critical Race Theory and inquiry pedagogy Inquiry Design Model to teach about race in the social science disciplines
