Spaces of Capital David Harvey, 2001 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Spaces of Capital David Harvey, 2001 Spaces of Capital David Harvey, 2019-07-30 David Harvey is unquestionably the most influential as well as the most cited geographer of his generation His reputation extends well beyond geography to sociology planning architecture anthropology literary studies and political science This book brings together for the first time seminal articles published over three decades on the tensions between geographical knowledges and political power and on the capitalist production of space Classic essays reprinted here include On the history and present condition of geography The geography of capitalist accumulation and The spatial fix Hegel von Thunen and Marx Two new chapters represent the author s most recent thinking on cartographic identities and social movements David Harvey s persistent challenge to the claims of ethical neutrality on behalf of science and geography runs like a thread throughout the book He seeks to explain the geopolitics of capitalism and to ground spatial theory in social justice In the process he engages with overlooked or misrepresented figures in the history of geography placing them in the context of intellectual history The presence here of Kant Von Thunen Humboldt Lattimore Leopold alongside Marx Hegel Heidegger Darwin Malthus Foucault and many others shows the deep roots and significance of geographical thought At the same time David Harvey s telling observations of current social environmental and political trends show just how vital that thought is to the understanding of the world as it is and as it might be Spaces of Capital/Spaces of Resistance Chris Hesketh, 2017-12-15 Based on original fieldwork in Chiapas and Oaxaca Mexico this book offers a bridge between geography and historical sociology Chris Hesketh examines the production of space within the global political economy Drawing on multiple disciplines Hesketh s discussion of state formation in Mexico takes us beyond the national level to explore the interplay between global regional national and sub national articulations of power These are linked through the novel deployment of Antonio Gramsci s concept of passive revolution understood as the state led institution or expansion of capitalism that prevents the meaningful participation of the subaltern classes Furthermore the author brings attention to the conflicts involved in the production of space placing particular emphasis on indigenous communities and movements and their creation of counterspaces of resistance Hesketh argues that indigenous movements are now the leading social force of popular mobilization in Latin America The author reveals how the wider global context of uneven and combined development frames these specific indigenous struggles and he explores the scales at which they must now seek to articulate themselves **Spaces of Contention** Byron Miller, 2016-04-01 As social movements have become more complex geographers are increasingly studying the spatial dynamics of collective resistance and sociologists and political scientists increasingly analyzing the role of space place and scale in contentious political activity Occupying a position at the intersection of these disciplinary developments this book brings together leading scholars to examine how social movements have employed spatial practices to respond to and shape

changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology and Political Science Spaces of Contention provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space The Wiley-Blackwell Companion to Cultural Geography Nuala C. A Companion To Marx's Capital, Volume 2 David Harvey, 2013-09-10 The biggest financial crisis since the Great Depression shows no sign of coming to a close and Marx's work remains key in understanding the cycles that lead to recession For nearly forty years David Harvey has written and lectured on Capital becoming one of the world's most foremost Marx scholars Based on his recent lectures and following the success of his companion to the first volume of Capital Harvey turns his attention to Volume 2 aiming to bring his depth of learning to a broader audience guiding first time readers through a fascinating and hitherto neglected text Whereas Volume 1 focuses on production Volume 2 looks at how the circuits of capital the buying and selling of goods realize value This is a must read for everyone concerned to acquire a fuller understanding of Marx's political economy Amman: Gulf Capital, Identity, and Contemporary Megaprojects Majd Musa, 2017-01-20 Gulf capital flows to Amman Jordan in the early twenty first century and the investment of this capital in large scale urban developments have significantly transformed the city's built environment Therefore to understand urban transformation in Amman during this period it is important to analyze it against the backdrop of Gulf capital and its integration into Jordan's economy and the integration of both the country's economy and Gulf capital into the global capitalist economy This book analyzes three cases of megaprojects planned for the city in the early twenty first century The New Downtown Abdali Jordan Gate and Sanaya Amman Drawing upon theories on urban development and capitalism identity

and discourse and urban development processes and cases in other cities the book investigates how contemporary megaprojects in Amman fit into the capitalist economy and its modes of production how capital flows construct a modern image of the city and how the new image and megaprojects represent the city residents as modern and create Amman as a global city This book presents a new approach to the study of the urban built environment in Amman providing a valuable interdisciplinary contribution to the scholarly work on globalizing cities especially in the Middle East Grounding Globalization Edward Webster, Rob Lambert, Andries Beziudenhout, 2011-08-02 Winner of the 2009 Distinguished Scholarly Monograph Prize awarded by the American Sociological Association Labor and Labor Movements section Claims have been made on the emergence of a new labour internationalism in response to the growing insecurity created by globalization However when persons face conditions of insecurity they often turn inwards The book contains a warning and a sign of hope Some workers become fatalistic even xenophobic Others are attempting to globalize their own struggles Examines the claim that a new labour internationalism is emerging by grounding the book in evidence rather than assertion Analyzes three distinct places Orange Australia Changwon South Korea and Ezakheni South Africa and how they dealt with manufacturing plants undergoing restructuring Explores worker responses to rising levels of insecurity and examines preconditions for the emergence of counter movements to such insecurities Highlights the significance of place and scale and demonstrates how the restructuring of multi national corporations and worker responses to this connect the two concepts **Resistance, Space and Political Identities** David Featherstone, 2008-09-22 Utilizing research on networked struggles in both the 18th century Atlantic world and our modern day Resistance Space and Political Identities The Making of Counter Global Networks challenges existing understandings of the relations between space politics and resistance to develop an innovative account of networked forms of resistance and political activity Explores counter global struggles in both the past and present including both the 18th century Atlantic world and contemporary forms of resistance Examines the productive geographies of contestation Foregrounds the solidarities and geographies of connection between different place based struggles and argues that such solidarities are essential to produce more plural forms of globalization
