Edmondson, 2023-08-04. *Nurturing Equanimity* Building A Caring Culture provides a much-needed blueprint for organizations looking to create a calm, balanced, and focused environment, inviting people to thrive in both their personal and professional lives. This blueprint of nurturing equanimity to build a culture that cares is a necessity for any organization concerned about identifying, recruiting, and retaining the human capital required to create a sustainable future in today's post-COVID marketplace. Securing the right people for any organization is difficult in most markets, doing so as the economy emerges from the pandemic-induced global recession challenges even the most satisfied workplace cultures. The pandemic's disruption and residue created an unstable and imbalanced culture across organizations of all sizes and in each industry that exposed numerous negative workplace characteristics many either knew or never stopped to consider. Examples included low

wages long and unnecessary commutes bad management and unfulfilling work These characteristics were symbolic of organizational cultures outdated toxic and imbalanced created by incompetence inertia and ineptitude The pandemic allowed employees to pause consider their life situation and realize their lives had been imbalanced for far too long Required reading for individuals from small to medium sized businesses large corporations non profit organizations and government offices Nurturing Equanimity Building A Culture That Cares offers employers and employees alike a valuable resource to use as they chart a course forward in a post pandemic marketplace

The 9th Annual International Seminar on Trends in Science and Science Education (AISTSSE) 2022, 2023-10-04 This is the ninth time we are hosting this seminar, and we are proud to inform you that this seminar is an annual event in our calendar and has been held every year since 2014. This year, for the third year, we are holding it via Zoom meeting online due to the Covid-19 pandemic. We are inviting internationally recognized speakers from several countries to share their latest discoveries in the fields of Biology, Chemistry, Physics, Mathematics, and Science Education. Well-known researchers in science and science education will share their experiences and knowledge so that we can stay up to date with the latest information. This is one of the goals of this seminar. As science researchers, we realize the importance of information exchange among us. The new information enlightens our minds and gives us ideas on what to do next in our research and how to do it. This new information often becomes the foundation for our next project in particular and sets the research trends for the upcoming year in general. Information exchange also keeps us updated, allowing us to give and receive suggestions and critiques that will lead to better results. Therefore, we need a forum where we can share and exchange information. Seminars, conferences, and other scientific gatherings are the media through which we can do this.
