INTERPRETATION

Interpretation, Limitations and Future Direction

The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while the chart shows an increasing trend for all topics as the subreddit grows, it particularly highlights Topic 4 (Mental Health), becoming the most prominent over time. This shift in focus aligns with broader societal concerns regarding mental health, especially in the wake of the COVID-19 pandemic. Additionally, the chart shows a consistent presence of academic pressure (Topic 1) and financial struggles (Topic 2), reflecting the core challenges of university life. The data also suggests a growing awareness of student support services (Topic 12) and university policies (Topic 13), indicating a more engaged student body. The visualization effectively tracks the evolving priorities and emotional states of UK university students, offering valuable insights into their lived experiences and the challenges they face.

However, it is important to acknowledge the limitations of this analysis. The data is derived from a single platform (Reddit) and may not represent the entire UK university student population. Furthermore, the analysis is based on self-reported experiences, which may be influenced by social desirability or other factors. Future research could explore these limitations by incorporating data from other sources, such as university surveys or interviews, to provide a more comprehensive understanding of student perspectives.
