Stereotyping and Prejudice Charles Stangor, Christian S. Crandall, 2013-07-24 This volume presents a contemporary and comprehensive overview of the great diversity of theoretical interests new ideas and practical applications that characterize social psychological approaches to stereotyping and prejudice All the contributions are written by renowned scholars in the field with some chapters focusing on fundamental principles including research questions about the brain structures that help us categorize and judge others the role of evolution in prejudice and how prejudice relates to language communication and social norms Several chapters review a new dimension that has frequently been understudied

the role of the social context in creating stereotypes and prejudice Another set of chapters focuses on applications particularly how stereotypes and prejudice really matter in everyday life These chapters include studies of their impact on academic performance their role in small group processes and their influence on everyday social interactions The volume provides an essential resource for students instructors and researchers in social and personality psychology and is also an invaluable reference for academics and professionals in related fields who have an interest in the origins and effects of stereotyping and prejudice

The Dynamics of Epistemic Injustice Amandine Catala, 2025-03-07 Epistemic injustice refers to the injustice that a person suffers specifically in their capacity as a knower i e as someone who produces conveys or uses knowledge Epistemic injustice occurs every day when members of non dominant groups are not included or taken seriously in conversations or social representations due to individual or societal biases Epistemic injustice is inherently connected to epistemic power and epistemic agency understanding and addressing epistemic injustice allows us to better understand and address epistemic power and agency and vice versa Yet despite vast and rich discussions of epistemic injustice which often invoke the notions of epistemic power and epistemic agency both notions remain undertheorized and hence largely elusive Amandine Catala offers a systematic account of epistemic power and agency by turning to the dynamics of epistemic injustice that is the many forms epistemic injustice can take the different sites and mechanisms through which it operates and the various transformations consequently required to cultivate greater epistemic justice Adopting standpoint theory as both a theoretical and a methodological framework Catala considers several pressing social questions such as deliberative impasses in divided societies colonial memory academic migration the underrepresentation of members of non dominant groups in certain fields the marginalization of minoritized minds such as intellectually disabled people and the underdiagnosing of autistic women By analyzing these social questions through the lens of the dynamics of epistemic injustice this book makes two main contributions it develops a systematic account of epistemic power and agency that highlights the interaction between individual and structural factors and it offers a pluralist account of epistemic injustice and agency that reveals their non propositional and non verbal dimensions

Stereotype Threat Michael Inzlicht, Toni Schmader, 2012 The 21st century has brought with it unparalleled levels of diversity in the classroom and the workforce It is now common to see in elementary school high school and university classrooms not to mention boardrooms and factory floors a mixture of ethnicities races genders and religious affiliations But these changes in academic and economic opportunities have not directly translated into an elimination of group disparities in academic performance career opportunities and levels of advancement Standard explanations for these disparities which are vehemently debated in the scientific community and popular press range from the view that women and minorities are genetically endowed with inferior abilities to the view that members of these demographic groups are products of environments that frustrate the development of the skills needed for success Although these explanations differ along a continuum of nature vs nurture they share in common a presumption that a large chunk of

our population lacks the potential to achieve academic and career success In contrast to intractable factors like biology or upbringing the research summarized in this book suggests that factors in one's immediate situation play a critical yet underappreciated role in temporarily suppressing the intellectual performance of women and minorities creating an illusion of group differences in ability Research conducted over the course of the last fifteen years suggests the mere existence of cultural stereotypes that assert the intellectual inferiority of these groups creates a threatening intellectual environment for stigmatized individuals a climate where anything they say or do is interpreted through the lens of low expectations This stereotype threat can ultimately interfere with intellectual functioning and academic engagement setting the stage for later differences in educational attainment career choice and job advancement

Culture and Morality: Things We Value Michael Shengtao Wu, Christine Ma-Kellams, Tian Xie, Yanyan Zhang, Yingnan Zhao, 2025-03-20 Morality refers to a set of values relating to right conduct against which behavior is judged to be acceptable or unacceptable It is a form of social norms that guides human behaviors Morality forms a fundamental part of our culture but there is a great range of variation in moral standards and the things we value in each given culture Behavior that is completely normal to Westerners such as choosing a job or partner at one's individual will could be considered immoral in other cultures People are rewarded with money and reputations if they exhibit moral actions approved by cultural expectations and are punished by sanctions for moral violations We also attribute positive feedback to people we consider moral e.g. empathetic filial and negative feedback to those we consider immoral untrustworthy disgusting Thus it is important to study the psychological antecedents processes and outcomes of morality

The Dynamic Perspective in Personality and Social Psychology Robin R. Vallacher, Stephen John Read, Andrzej Nowak, 2002-11-01 Recent years have witnessed the ascendance of a new way to conceptualize and investigate the nature of dynamism at different levels of psychological reality Areas of inquiry as diverse as cognitive neuroscience developmental psychology organizational behavior and political sociology are being reframed in terms that allow rigorous and precise insight into basic dynamic processes There are signs that this new approach to dynamics is emerging as a potentially integrative paradigm for personality and social psychology as well This special issue highlights this new paradigm and illustrates its relevance to a broad spectrum of topics in personality and social psychology

Stereotypes and Intercultural Relations: Interdisciplinary Integration, New Approaches, and New Contexts John W. Berry, Dmitry Grigoryev, Lusine Grigoryan, Anastassia Zabrodskaia, Susan T. Fiske, 2021-11-02

Racial and Cultural Dynamics in Group and Organizational Life Mary B. McRae, Ellen L. Short, 2009-09-16 The field has been waiting for a masterpiece like *Racial and Cultural Dynamics in Group and Organizational Life* for a long time It provides a thoughtful account of the subtle barely visible and sometimes unspeakable influences of racial and cultural dynamics that occur in groups Leo Wilton Binghamton University State University of New York I believe that by focusing on group diversity this book aligns with a major trend that has not received enough attention Christopher J. McCarthy University of Texas at Austin This book presents

a theoretical framework for understanding leadership and authority in group and organizational life Using relational psychoanalytic and systems theory the authors examine conscious and unconscious processes as they relate to racial and cultural issues in the formation and maintenance of groups Unique among group dynamics texts the book explores aspects of racial and cultural influences in every chapter Readers will enhance their analytic and practice skills in addressing factors that impact diverse groups and organizations including ethical considerations social roles strategies for leadership dynamics of entering and joining and termination Key Features Case examples help readers integrate theory and practice as illustrated in transcripts of interactions from group sessions A group work competencies list ensures that readers master concepts as they progress through the book An assessment form allows the student or practitioner to evaluate concrete dynamics of groups such as size and gendered and racial composition This text is appropriate for graduate level courses incorporating group dynamics and multicultural topics in departments of psychology education counseling and social work It is also a valuable resource for counselors psychologists and other mental health professionals in preparation for group work

The Social Psychology of Politics Victor C. Ottati, R. Scott Tindale, John Edwards, Fred B. Bryant, Linda Heath, Yolanda Suarez-Balcazar, Emil J. Posavac, 2012-12-06 Early studies of political behavior examined the sociological attitudinal and rational determinants of political behavior However none of these approaches provided a descriptive model of how people process political information and make political decisions under naturalistic conditions that involve limited cognitive capacity and motivation Fortunately contemporary approaches within the field of political psychology have begun to address these concerns Inspired by recent advances in the area of social psychology researchers are rapidly developing more realistic and detailed models of the psychological process that determines political judgements and behavior Early attempts to merely predict political behavior have been replaced by an attempt to describe the actual process whereby individuals gather interpret exchange and combine information to arrive at a political judgement or decision This volume provides comprehensive coverage of this pioneering era of research in political psychology
