

STEREOTYPES

DEFINITION

Stereotypes are oversimplified perceptions of people based on their characteristics. They can be harmful because they involve making premeditated judgements about others.

TYPES

Common types of stereotypes include gender, race, sexual, social-class, (dis)ability, age, nationality, political, and religious stereotypes.

These prejudices can get in the way of people getting jobs, lead to social exclusion, and create arbitrary in-groups and out-groups.

Stereotypes And Stereotyping Stereotypes And Stereotyping:

Stereotypes and Stereotyping C. Neil Macrae, Charles Stangor, Miles Hewstone, 1996-03-01 Following a broad overview that defines stereotypes the book addresses how they are formed and developed in chapters that cover the social psychology of stereotypes the impact of physical appearance on their formation and methods of assessing their accuracy Internationally renowned authors consider the function and use of stereotypes exploring their complex interrelationship with linguistic biases prejudice and discrimination and intergroup and interpersonal perception Chapters then discuss how stereotypes can be undermined detailing social psychological interventions to improve intergroup relations and examining ways that individual targets of stereotyping might motivate others to change A concluding chapter takes a historical view of stereotype research tracing the evolution of the field and evaluating current theories and methodologies Stereotyping and Prejudice Daniel Bar-Tal, Carl F. Graumann, Arie W. Kruglanski, Wolfgang Stroebe, 2013-11-11 The study of stereotyping and prejudice is a study of human nature group membership and intergroup relationships It sheds light on each of these aspects of social psychology With respect to the first two it has been observed that since groups provide the best framework for satisfying various human needs individuals continuously organize themselves in collectives They belong to a variety of groups many of which they voluntarily select and some to which they are ascribed Group membership therefore is one of the most salient and important of an individual's characteristics The implication of this characteristic is that human beings not only constantly classify other people into group categories either by identifying membership or constructing their own categories but also judge and evaluate them on this basis The stereotypes and prejudice are outcomes of this process They are the beliefs and attitudes toward members of another group In addition the study of stereotyping and prejudice reflects an interest in intergroup relationships While we recognize that a discussion of intergroup relationships may focus on behaviors describing actions such as confrontations violence wars cooperation alliance negotiation or coordination we also believe that each of these intergroup behaviors is mediated by perceptions beliefs and attitudes In the case of intergroup behaviors the listed actions are not performed instinctively or mindlessly but are preceded by cognitive processes which among other outputs involve the formation of stereotypes and prejudice toward the other group **Stereotypes and stereotyping in early modern England** Koji Yamamoto, 2022-10-25 Early modern stereotypes used to be studied as evidence of popular belief something mired with prejudices and commonly held assumptions Stereotypes and stereotyping in early modern England goes beyond this view by exploring practices of stereotyping as contested processes To do so the volume draws on recent works on social psychology and sociology It thereby brings together early modern case studies and explores how stereotypes and their mobilisation shaped various negotiations of power in spheres of life such as politics religion economy and knowledge production An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence *Stereotypes, Cognition and Culture* Perry Roy Hinton, 2000 Focuses on social inference the assumptions we make about
