

SERVICE MANUAL

064 and 066

Chain Saws

As the design concept of these two models is almost identical, the descriptions and servicing procedures generally apply to both. Differences are described in detail.

You should make use of the illustrated parts lists while carrying out repair work. They show the installed positions of the individual components and assemblies. Microfilmed parts list are always more up to date than printed lists.

A fault on the machine may have several causes. Consult the "troubleshooting charts" when tracing faults.

Refer to the "Technical Information Bulletins" for engineering changes which have been introduced since publication of this service manual.

Service manuals and technical information bulletins describing engineering changes are intended exclusively for the use of STIHL servicing dealers and staff and must not be passed on to third parties.

Chain saw on assembly stand

Servicing and repairs are made considerably easier if the saw is mounted on assembly stand 5910 850 3100 or 5910 890 3100. This enables the saw to be swivelled to the best position for the ongoing repair and thus leaves both hands free.

The saw is can be quickly secured to the stand by means of the two bar mounting studs and nuts.

The STIHL Special Tools manual lists all special servicing tools currently available from STIHL.

Always use original STIHL replacement parts. Original STIHL parts can be identified by the STIHL part number, the **STIHL** logo and the STIHL parts symbol. . The symbol may appear alone on small parts.
