Warnings

All units are recommended for indoor use. Unit must be tested periodically to verify the life of battery. STI recommends you change the 9 Volt battery twice a year. When purchasing a siren/strobe alarm, you will need to periodically test the connections to make sure audibles function at a sound level to alert staff. Installer may need to purchase a simple audio-meter, typically available at your local electronics store, to measure the sound in areas where the alarm is expected to be heard during normal noise environment. Results from this test may prove it beneficial to purchase additional siren/strobe alarm units.

All specifications and information shown are current as of publication and subject to change without notice.
