Stihl 550 Brush Saw Service Manual:

Tree Farmer ,2000 Brush-clearing Head Evaluation Andy Trent,2003 Describes the evaluation of a new steel bladed head for brush clearing saws that can be used to cut small diameter trees less than 2 inches in diameter efficiently The brush clearing head has an aluminum alloy housing with three replaceable steel blades that do not have to be sharpened The head eliminates many of the problems encountered when using circular saw blades to cut brush The new tool may make it possible to thin stands of lodgepole pine or ponderosa pine while the trees are still young and small Trees in these stands have usually been allowed to grow large enough so that they could be safely cut with chain saws The crowded stands were growing slowly during this period If the stands were thinned earlier the remaining trees would grow more quickly and wildlife species that prefer open stands would benefit However when trees are small they must be cut off near the ground during thinning to keep their lowest limbs from regrowing Making cuts close to the ground with chain saws can be dangerous and is tiring In addition chain saw blades must be resharpened when they strike rocks or dirt So must the blades of circular saws The steel blades of the head do not require sharpening but they must be replaced when the blades have become too badly worn In rocky areas blades might have to be replaced daily The head throws debris that can cause injuries Operators must wear protective equipment Even though operators wore protective equipment during the evaluations they suffered minor injuries in the chest and groin **Power Farming in Australia and New Zealand Technical Manual** ,1968 Forest Industries ,1983 *Farmers and Consumers Market Bulletin* ,2010 **Timber Processing** ,1992 *Consumers Digest* ,1989 Stihl FS 300, 350, 400, 450 Brushcutter Instruction Manual Stihl, Stihl FS 81, 86, 106 Brushcutters Instruction Manual/owner's Manual|brushcutters Instruction Manual/owner's Manual Stihl, Chain Saw Service Manual ,1981
