leading and up and coming corpus linguists The studies included in the volume are based on a wide range of corpora spanning first and second language academic writing at different levels of writing expertise containing texts from a variety of academic disciplines and sub disciplines and of different academic registers Particularly novel aspects of the collection are the inclusion of research that combines rhetorical moves with multi dimensional analysis studies that cover both fixed and variable phraseological items lexical bundles phrase frames constructions and work that is based on corpora of English as an academic lingua franca Going beyond merely summarizing their findings the authors also discuss what their research means for academic writing practice and pedagogical settings The volume will be of interest to researchers students and teachers who would like to expand their knowledge of how academic writing functions and what it looks like in a variety of contexts
