This book does not leave you in the dark but provides sound advice on how to keep disaster recovery planning projects on track, how to avoid dangerous scope creep and how to work effectively with the variety of personality types that you will encounter. Disaster recovery planning is really about sleep. When you get the call at 3:00 am that your database is lost, don't wake up with that icy feeling in your veins. Instead, wake up with confidence that you have a plan in place, a plan that you've practiced that management has bought into, a plan that you can execute even while half asleep to get your database, your company and your job back on track.
