Authoritarian Actors and Strategic Digital Information Operations Ihsan Yilmaz, Shahram Akbarzadeh, 2025-11-14 This book explores the complex web of Strategic Digital Information Operations SDIOs defined as deliberate efforts by state and non state actors to manipulate public opinion and emotions using digital technologies that intersect with political ambitions to create a complex environment ripe for manipulation Drawing from extensive research and case studies the book examines how actors ranging from authoritarian regimes to extremist groups such as ISIS and even political entities in democratic countries leverage digital platforms to further their agendas As such it provides a comprehensive overview of SDIOs their evolving tactics and implications for democracy governance and international relations It examines the diverse tactics employed by these actors from spreading half truths and distractions to leveraging historical and religious narratives in the form of conspiracy theories or non conspiracy narratives aiming to control the discourse and shape the online environment to their advantage This research challenges the conventional focus on disinformation highlighting the shift toward more sophisticated and less discernible means of digital manipulation globally and argues that SDIOs have become a pivotal tool for influencing public opinion shaping political narratives and even undermining democratic processes This book will be of key interest to scholars students and practitioners in communications media studies political sociology comparative politics security studies political science and international politics The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 International license

The Algorithmic Age of Personality James Yékú, 2025-05-01 As the affordances of authorship and reading practices on social media become deeply mediated by algorithmic curation they encourage closer attention to the author's personality as fundamental to literary production The Algorithmic Age of Personality African Literature and Cancel Culture challenges any lingering utopianism in the role of digital media in African cultural productions by exploring how algorithms engender a culture of outrage conflict and personality driven and ego battles that distract from aesthetic and ethical evaluations of literary texts In Y k's careful attention to how contemporary African literary practices are significantly marked by the extractivist and affective logics of social media algorithms he articulates the current state of debating in the critical universe of African literature and connects this to the phenomenon of cancel culture Rather than a Manichean understanding of

cancel culture Y k illustrates how the politics of both conservative and liberal polarization shape what can and cannot be said in online commentaries on African literary forms The outcome is a work that situates postcolonial classics by Chinua Achebe and Joseph Conrad in online debates on cancel culture and decolonization while responding to social media discussions on Western literary prizes ethnicity and sexuality involving writers like Soyinka Ng g Wainaina and Adichie **Proceedings on**

absolute commitment to free speech had badly lost its way He blamed it for the proliferation of what he called the woke mind virus and claimed that the survival of democracy and the human race itself depended on the future of the site In January of 2022 Musk began secretly accumulating Twitter stock By April he was its largest shareholder and soon after made an unsolicited offer to purchase the company for the unimaginable sum of 44 billion dollars Backed into a corner Twitter's board accepted his offer but Musk quickly changed his mind forcing Twitter to sue him to close the deal in October The richest man on earth controlled one of the most powerful media platforms in the world but at what price Before long Twitter would be gone for good replaced by something radically different as Musk remade the company in his own image from the ground up The story of the showdown between Musk and Twitter and his eventual takeover of the company is unlike anything in business or media that has come before In vivid cinematic detail Conger and Mac follow the inner workings of the company as Musk lays siege to it first from the outside as one of its most vocal users and then finally from within as a contentious and mercurial leader Musk has shared some of his version of events but Conger and Mac have uncovered the full story through exclusive interviews unreported documents and internal recordings at Twitter following the billionaire's takeover With unparalleled sources from within and around the company they provide a revelatory three dimensional and definitive account of what really happened when Musk showed up spoiling for a brawl and intent on revolution with his merciless sycophantic cadre of lawyers investors and bankers This is the defining story of our time told with uncommon style and peerless rigor In a world of viral ideas and emotion who gets to control the narrative who gets to be heard and what does power really cost
