The Seeds of Toby Donovan Bailey, LSW, EDD, 2025-05-06 Why is there continued racial disparity within the American criminal justice system Is it a natural propensity for crime Is it a racist criminal justice system Is it a culture of poverty Is it the war on drugs Is it dysfunctional family structures Is it choices Is it economics Is it spiritual issues Is it a lack of education Is it mental health Is it identity Among the various issues within crime and punishment and the fact

that African Americans and other minorities disproportionately engulf the prisons jails and probation caseloads why is it that so many are in the criminal justice system and continue to be at rates that continuously plague American communities How about the aspects of historical trauma and improper identity paradigms How about the fact that criminality has become normality How about the old biblical adage that as a man thinks so is he There is a cultural identity crisis in many that frequent the criminal justice system and amid the various efforts to correct and change behavior address therapeutic measures and ensure that the criminal justice system yields evidence based practices and strength based treatment modalities The system sadly lacks the cultural competence that would change The New Jim Crow and the face of crime in America As much as activism and advocacy have rightfully focused on the racist aspects of a criminal justice system that has improperly and historically overloaded the system the movement must be more thorough after generations of minorities were incarcerated and overwhelmed by the collateral consequences of imprisonment There must be a more in depth focus on keeping minorities out of the system breaking a historical trauma that has grown over centuries The system must incorporate ethnocentric treatment components focused on changing identity paradigms What would that mean and why is this important

Blueprints Dominic Hough, Make money with this e book **Global Leadership Literacy** Publication Contributors ,2024-12-09 Global Leadership Literacy provides an invaluable reference point to understand how cultural differences impact upon leadership styles and practices This new issue of our ongoing global leadership series presents country specific analyses of culturally endorsed leadership practices and styles in the countries Afghanistan Algeria Armenia Chile Dominican Republic El Salvador Greece Nigeria Paraguay Philippines Sierra Leone Suriname and Syria This publication contains contributions from around 150 researchers from 41 countries who participated in the Cross Cultural Global Business Skills electives offered by the Part time Academy of the Faculty of Business and Economics at the Amsterdam University of Applied Sciences *Re-Situating Utopia* Matthew Nicholson,2019-11-11 In *Re-Situating Utopia* Matthew Nicholson argues that international law and international legal theory are dominated by a blueprint utopianism that presents international law as the means of achieving a better global future Contesting the dominance of this blueprintism Nicholson argues that this approach makes international law into what philosopher Louis Marin describes as a degenerate utopia a fantastical means of trapping thought and practice within contemporary social and political conditions blocking any possibility that those conditions might be transcended As an alternative Nicholson argues for an iconoclastic international legal utopianism Utopia not as a blueprint for a better future operating within the confines of existing social and political reality but as a means of seeking to negate and exit from that reality as the only way to maintain the idea that international law offers a path towards a truly better future *Physics Of Reality, The: Space, Time, Matter, Cosmos - Proceedings Of The 8th Symposium Honoring Mathematical Physicist Jean-pierre Vigi* Richard L Amoroso,Louis H Kauffman,Peter Rowlands,2013-09-18 A truly Galilean class volume this book introduces a new method in theory formation completing the tools of epistemology It covers a broad spectrum of theoretical and mathematical physics by researchers from over 20 nations from four continents Like Vigier himself the Vigier symposia are noted for addressing avant garde cutting edge topics in contemporary physics Among the six proceedings honoring J P Vigier this is perhaps the most exciting one as several important breakthroughs are introduced for the first time The most interesting breakthrough in view of the recent NIST experimental violations of QED is a continuation

of the pioneering work by Vigier on tight bound states in hydrogen The new experimental protocol described not only promises empirical proof of large scale extra dimensions in conjunction with avenues for testing string theory but also implies the birth of the field of unified field mechanics ushering in a new age of discovery Work on quantum computing redefines the qubit in a manner that the uncertainty principle may be routinely violated Other breakthroughs occur in the utility of quaternion algebra in extending our understanding of the nature of the fermionic singularity or point particle There are several other discoveries of equal magnitude making this volume a must have acquisition for the library of any serious forward looking researchers
