The Case By Case Approach To Privatization Techniques And Examples World Bank Technical Papers:

The Case-by-case Approach to Privatization Dick Welch, Olivier Frémond, 1998-01-01 This report provides a brief review of recent trends and key policies in strengthening national agricultural research systems Chapters provide a brief overview of the recent evolution of national research systems and a synthesis of policy issues and good practices for developing these systems including the involvement of universities and the private sector They also focus on key policy and institutional reforms for strengthening public research institutions including funding research management and client orientation Finally they discuss implications for the World Bank in its ongoing efforts to strengthen national research systems **Rethinking**

Municipal Privatization Oliver D. Cooke, 2007-12-26 This book examines one of the most high profile municipal privatizations the privatization of New York City's Central Park The fiscal crisis of the 1970s established the political and cultural opening for privatizations which were justified on the basis of increasing efficiency However as Cooke demonstrates these justifications were deliberate *Latin American Insolvency Systems* Malcolm Rowat, José Astigarraga, 1999 Modern society has eliminated the inhumane debtors prisons for handling the insolvent debtor and in their stead have enacted benign modern laws in the area of bankruptcy Unscrupulous merchants now use these benign laws for fraudulent purposes Based on case studies in Argentina Brazil Mexico and Venezuela this is the first publication to provide recommendations about the important legal and institutional issues that are involved in bankruptcy reform in a critical region of the global economy The authors note that effective bankruptcy policy balances several requirements for the conduct of a stable successful economy For example it might be in the greatest interests to all parties if a company is given an opportunity to restructure and make use of the scarce resources remaining in its possession On the other hand inefficient firms especially those that have long survived only on state subsidies may need to fail in order to free space in the market for more efficient better managed companies Finally there are the needs to enforce loan contracts and provide an equitable system of debt collection

Energy from Biomass Peter Quaak, Harrie Knoef, Hubert E. Stassen, 1999 While energy is essential for development standard fossil fuels are often in short supply in countries where it is needed most However alternative fuel resources abound in the form of agricultural and municipal waste or biomass This report reviews the state of the art of biomass combustion and gasification systems their advantages and disadvantages It also encourages investment in use of these technologies to enable developing countries to better exploit their biomass resources and help close the gap between their energy needs and their energy supply *Legal Aspects of Privatisation* Bulent Seven, 2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e.g. labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide

guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades

DeMISTifying MIS Luc Lecuit, 1999-01-01 Managers are often far from the real action so they need something that will tell them what is going on Luckily the rapid evolution of tools for collecting analyzing and diffusing information has greatly improved our ability to manage from a distance However the speed of technological change means that changes in management practices and tools are inescapable Development of Management Information Systems MIS for social funds has become essential due to some of the characteristics unique to these types of projects or organizations Among these unique characteristics are the need for transparency and efficiency because of the highly visible nature of the activities These guidelines define MIS and underscore its importance They also outline specific tools to assist in selection of an MIS and summarize its design and implementation These guidelines are meant to be a practical tool to help those who are setting up or managing a social fund navigate in MIS waters Technical jargon is kept to a minimum and a glossary of technical terms is provided to assist readers who do not have a technical background However special Technical Boxes have been included for the experts in this field

Regional and International Trade Policy Csaba Csáki, John Nash, 1999-01-01 With appropriate preparation and policies the enlargement of the European Union EU will result in a broader and higher level integration of European agriculture create an environment more conducive to further liberalization of global agricultural trade and lead to further opening of European markets As part of the World Bank's Strategic Compact Initiative the Bank has coordinated activities to help the ten EU accession countries achieve EU membership These activities include the preparation of studies to facilitate implementation of necessary reforms and sponsoring seminars and workshops to disseminate and analyze the results This volume presents the major papers and summaries of one of the Workshop deliberations This volume includes the following topics lessons learned from other regional agricultural trade agreements the evolution of the Common Agricultural Policy CAP an analysis of the economic impact of trade flows the harmonization of agricultural policies within trade

agreements the implications of the external trade environment for the accession countries the role of sanitary and phytosanitary trade rule in EU accession quantifying the incentive and farm income effects of agricultural support policies in transition economies major challenges to agricultural input regulation and trade during transition and EU accession concluding comments by the World Bank

Planning the Management, Operation, and Maintenance of Irrigation and Drainage Systems ,1998 This paper provides the basis for the preparation of manuals necessary for managers and staffs to perform needed activities at the proper time The guide provides a comprehensive list of issues that should be addressed in operation and maintenance manuals for irrigation and drainage systems and a listing of published materials and working papers which will assist in the formulation of plans for operation and maintenance The paper serves as a valuable tool to help improve the performance of irrigation and drainage systems and to assist managers in developing and improving effective organizations to serve water consumers better

Privatization and Deregulation in the Gulf Energy Sector The Emirates Center for Strategic Studies and Research,1999-03-17 The papers contained in this volume were among those presented at ECSSR s Third Annual Energy Conference entitled Privatization and Deregulation in the Gulf Energy Sector held in Abu Dhabi October 25 26 1997 This conference united leading practitioners and scholars in an effort to explore the important micro and macro issues related to the privatization and deregulation of energy sector Topics related to oil production and refining gas and electricity production and their transmission and distribution were discussed This volume assesses the arguments for and against deregulation of the energy sector and highlights the political legal institutional and resource requirements for successful implementation of a privatization program drawing on international experience Indeed privatization is spreading globally after its small and uncertain beginnings in Britain in the early 1980s Today states of the Gulf Co Operation Council GCC are actively examining the possibility of privatizing a number of key industries and infrastructure projects The ideal route to prosperous and effective privatization programs is for the GCC states to learn from the mistakes of other countries in this field while emulating the success stories

Privatization of the Power and Natural Gas Industries in Hungary and Kazakhstan ,1999-01-01 Hungary and Kazakhstan have privatized a large portion of their electric power and natural gas industries but have followed different strategies In contrast the other former socialist countries in Central and Eastern Europe have privatized almost none Has the privatization in these two countries been a success What lessons can other countries learn from their experience These countries began their reforms from different starting points The Hungarian power and gas sectors had a long history of being relatively well managed In contrast Kazakhstan inherited pieces of the old systems that were designed to serve the needs of the Soviet Union and had to develop new organizations to manage the system Privatization of the Power and Natural Gas Industries in Hungary and Kazakhstan analyzes how each country dealt with the key issues involved in the restructuring and privatization of the power and gas sectors These issues include industry structure wholesale market labor and management relations regulatory framework
