Nonprofit organizations their governing structures boards of directors and their newest constituency members who represent the public at large are the subject of this book In recent years new mechanisms have been developed to link citizens with government and with diverse policy making entities Earlier it was assumed that citizens had little interest in policy deliberations and responsibility for public needs was best left to the experts Many citizens now believe that they have a legitimate right to influence how power is exercised in public organizations Koff constructs a demographic profile of public members their activities and their opinions about board membership She also catalogues the perspectives of executive directors about public members identifies specific problems related to public participation and suggests strategies to help resolve them How effectively these bodies perform and how well they respond to the public are in part determined by the talents and activities of their members All of these members especially public members need appropriate tools to be able to perform in a superior fashion Despite the importance of governing bodies to an organization's performance there has been little examination of board members in general and specifically of public members This is the first book length study on the subject

Public Deliberation on Climate Change Lorelei L. Hanson, 2018-02-05 There exists in both academic and political circles a growing interest in public deliberation as an alternative to the sometimes adversarial and polarizing public engagement activities that result in the pitting of experts against lay people Proponents of public deliberation claim that a more deliberative process can engage a diversity of participants in a more guided process that better balances expert knowledge and citizen inclusion Such an approach holds particular promise where citizens and governments engage in discussions of the most complex and intractable issues like climate change Given the host of challenges climate governance presents and the global consequences of our response to them the experience and knowledge shared by Hanson and the contributors to *Public Deliberation on Climate Change* provide an important framework for advancing public conversations and processes on this and other wicked problems The lessons contained in the volume were gained as a result of a five year multidisciplinary community university research project called Alberta Climate Dialogue ABCD which drew together scholars practitioners citizens civil society members and government officials from across Alberta at four public deliberations By highlighting the value tensions and trade offs and examining the impact that the design of the deliberations has on policy and the creation of conditions that encourage exchange the contributors aim to build capacity within our institutions and society to find new ways to discuss and solve complex problems
