*Theories and Practices of Development* Katie Willis, 2011-02-25 Global economic crisis and the implications of global environmental change have led academics and policy makers to consider how development in all parts of the world should be achieved However development has always been a contested idea While often presented as a positive process to improve people's lives the potential negative dimensions of development on people and environments must also be recognized *Theories and Practices of Development* provides a clear and user friendly introduction to the complex debates around how development has been understood and achieved The second edition has been fully updated and expanded to reflect global political and economic shifts as well as new approaches to development The rise of China and India is given particular attention as is the global economic crisis and its implications for development theories and practice There are new sections on faith based development and the development dimensions of climate change as well as greater engagement with development theories as they are put into practice in the Global North The book deals with the evolution of development ideas and policies focusing on economic political social environmental and spatial dimensions It highlights how development cannot be considered as a neutral concept but is entwined with inequalities in power at local as well as national and global scales The use of boxed examples tables and illustrations helps students understand complex theoretical ideas and also demonstrates how development theories are put into practice in the real world Each chapter ends with a summary section discussion topics suggestions for further reading and website resources

*Empires and Autonomy* Stephen Streeter, John Weaver, William D. Coleman, 2010-01-01 Globalization is one of the most significant developments of our time But what distinguishes the present era from golden periods of empire building in past Which elements of contemporary globalization and forms of autonomy are particularly novel and which are merely continuations of long standing historical trends To address these questions *Empires and Autonomy* brings together a distinguished group of scholars who explore particular historical moments that involved either the establishment or protection of autonomy These global encounters inevitably involved friction and the contributors examine the dialectic between globalization and autonomy at historical junctures that range in time from the Chinese occupation of Tibet in 1720 to the meeting between Ronald Reagan and Mikhail Gorbachev in 1986 that led to the end of the Cold War By examining these uniquely telling moments in the history of globalization and autonomy this innovative collection provides novel insights into changes that are overtaking our contemporary world

*Handbook of the Sociology of Gender* Janet Saltzman Chafetz, 2006-11-22 During the past three decades feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present Intrapsychic interactional and collective

social processes are gendered as are micro meso and macro social structures Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non academic activist thinkers However while incorporating some cross disciplinary material this volume focuses specifically on socio logical theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines
