Framework Ai In Everyday Life:

The Artificial Intelligence and Machine Learning Blueprint: Foundations, Frameworks, and Real-World Applications Priyambada Swain, 2025-08-06 In the current era of data centric transformation Artificial Intelligence AI and Machine Learning ML are influencing organizational strategies and operations The AI and Machine Learning Blueprint serves as a guide connecting academic concepts with industry applications It is intended for both students seeking basic knowledge and professionals interested in deploying scalable AI systems The book covers core mathematical principles relevant to AI including linear algebra probability statistics and optimization and provides an overview of classical machine learning algorithms neural networks and reinforcement learning Concepts are illustrated with practical examples Python code and case studies from sectors such as healthcare finance cybersecurity natural language processing and computer vision Operational considerations are also addressed with chapters on MLOps model deployment explainable AI XAI and ethics The text concludes with information on emerging topics including generative AI federated learning and artificial general intelligence AGI With a blend of theoretical depth and practical relevance this book is an essential blueprint for mastering AI and ML in today s intelligent systems landscape IoT, Big Data and AI for Improving Quality of Everyday Life: Present and Future Challenges Pradeep Kumar Singh, Sławomir T. Wieruchoń, Wiesław Pawłowski, Arpan Kumar Kar, Yugal Kumar, 2023-08-23 This book focuses mainly on the usages of three key technologies IoT big data and AI for various day to day applications Further it explores the possibilities of future research based on the usages of latest information systems This book explores the current research and challenges to be faced by different researchers for building intelligent information solutions using key technologies IoT big data and AI in improving quality of lives in smart cities and explores the limitations and capabilities of these three key computing technologies The book is organized into three major parts each part includes chapters exploring a specific topic and there are PART 1 IoT for Real World Solutions ii Part 2 Big Data And Cloud Computing for Innovative Solutions For Day to Day Lives and iii Part 3 Artificial Intelligence for Everyday Lives This book may be useful to the scientists scholars and researchers who are working in the field of computer science and engineering and communication engineering along with the students in these subjects who are working or willing to work on IoT big data and AI technologies for improving quality of everyday life Specialists as well as student readers find the book chapters encouraging and helpful IoT data science cloud and AI all are the undergraduate UG bachelor subjects Use of these three key technologies for building new applications for better world is helpful for UG and postgraduate PG MS Programmes students as an elective and core course This book may also be very useful for the Ph D research scholars during their course work and may be used as an instrument to identify the different challenges associated with information systems **Artificial Intelligence and Data Mining Approaches in Security Frameworks** Neeraj Bhargava, Ritu Bhargava, Pramod Singh Rathore, Rashmi Agrawal, 2021-08-24 ARTIFICIAL INTELLIGENCE AND DATA MINING IN SECURITY FRAMEWORKS

Written and edited by a team of experts in the field this outstanding new volume offers solutions to the problems of security outlining the concepts behind allowing computers to learn from experience and understand the world in terms of a hierarchy of concepts with each concept defined through its relation to simpler concepts Artificial intelligence AI and data mining is the fastest growing field in computer science AI and data mining algorithms and techniques are found to be useful in different areas like pattern recognition automatic threat detection automatic problem solving visual recognition fraud detection detecting developmental delay in children and many other applications However applying AI and data mining techniques or algorithms successfully in these areas needs a concerted effort fostering integrative research between experts ranging from diverse disciplines from data science to artificial intelligence Successful application of security frameworks to enable meaningful cost effective personalized security service is a primary aim of engineers and researchers today However realizing this goal requires effective understanding application and amalgamation of AI and data mining and several other computing technologies to deploy such a system in an effective manner This book provides state of the art approaches of artificial intelligence and data mining in these areas It includes areas of detection prediction as well as future framework identification development building service systems and analytical aspects In all these topics applications of AI and data mining such as artificial neural networks fuzzy logic genetic algorithm and hybrid mechanisms are explained and explored This book is aimed at the modeling and performance prediction of efficient security framework systems bringing to light a new dimension in the theory and practice This groundbreaking new volume presents these topics and trends bridging the research gap on AI and data mining to enable wide scale implementation Whether for the veteran engineer or the student this is a must have for any library This groundbreaking new volume Clarifies the understanding of certain key mechanisms of technology helpful in the use of artificial intelligence and data mining in security frameworks Covers practical approaches to the problems engineers face in working in this field focusing on the applications used every day Contains numerous examples offering critical solutions to engineers and scientists Presents these new applications of AI and data mining that are of prime importance to human civilization as a whole
