Reading Bestsellers Danielle Fuller,DeNel Rehberg Sedo,2023-04-27 Readers are essential agents in the production of bestsellers but bestsellers are not essential to readers leisure pursuits The starting point in this Element is readers opinions about and their uses of bestselling fiction in English Readers relationships with bestsellers bring into view their practices of book selection and their navigation of book recommendation culture Based on three years of original research 2019 2021 including a quantitative survey with readers interviews with social media influencers and qualitative work with international Gen Z readers in a private Instagram chat space the authors highlight

three core actions contemporary multimodal readers make choosing connecting and responding in a transmedia era where on and offline media practices co exist The contemporary multimodal reader or the MMR3 they argue illustrates the pervasiveness of recommendation culture reliance on trusted others and an ethic of responsiveness *Provoking Curriculum Studies* Nicholas Ng-a-Fook, Awad Ibrahim, Giuliano Reis, 2015-08-11 *Provoking Curriculum Studies* pushes forward a strong reading of the theoretical and methodological innovations taking place within curriculum studies research Addressing an important gap in contemporary curriculum studies conceptualizing scholars as poets and the potential of the poetic in education it offers a framework for doing curriculum work at the intersection of the arts social theory and curriculum studies Drawing on poetic inquiry psychoanalysis phenomenology life writing and several types of arts based research methodologies this diverse collection spotlights the intellectual genealogies of curriculum scholars such as Ted Aoki Geoffrey Milburn and Roger Simon whose provocations inquiries and recursive questioning link the writing and re writing of curriculum theory to acts of strong poetry Readers are urged to imagine alternative ways in which professors teachers and university students might not only engage with but disrupt blur and complicate curriculum theory across interdisciplinary topographies in order to seek out blind impresses those areas of knowledge that are left over unaddressed by mainstream curriculum scholarship and that instigate difficult questions about death trauma prejudice poverty colonization and more

Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit one of the most popular and least studied social platforms of the early 21st century The book inspires new ways of thinking about Reddit considering it from multiple perspectives through a historical lens as a site where identity is forged as a democracy as a community and as a news aggregator and distributor By bringing theories from computer mediated communication communication studies and sociology to bear on original large scale observational analyses of Reddit s communities this book provides a uniquely comprehensive overview of the platform s first 15 years *Understanding Reddit* will help us make sense of how rapidly growing communities function in an era of mass online anonymity Serving both as a primer on how social behavior on Reddit plays out and as a way of locating it within multiple theoretical traditions the book will offer important insights to scholars and students in the disciplines of communication media studies information science internet and emerging media studies and sociology *Beyond open access: visions for open evaluation of scientific papers by post-publication peer review* Nikolaus Kriegeskorte, Diana Deca, A scientific publication system needs to provide two basic services access and evaluation The traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2 4 pre publication peer reviews and by keeping the reviews secret As a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper s quality is the prestige of the journal it appeared in Open access is now widely accepted as desirable and is slowly beginning to become a reality However the second essential element evaluation

has received less attention Open evaluation an ongoing post publication process of transparent peer review and rating of papers promises to address the problems of the current system However it is unclear how exactly such a system should be designed The evaluation system steers the attention of the scientific community and thus the very course of science For better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions Evaluation therefore is at the heart of the entire endeavor of science As the number of scientific publications explodes evaluation and selection will only gain importance A grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention So far scientists have left the design of the evaluation process to journals and publishing companies However the steering mechanism of science should be designed by scientists The cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships This Research Topic in Frontiers in Computational Neuroscience collects visions for a future system of open evaluation Because critical arguments about the current system abound these papers will focus on constructive ideas and comprehensive designs for open evaluation systems Design decisions include Should the reviews and ratings be entirely transparent or should some aspects be kept secret Should other information such as paper downloads be included in the evaluation How can scientific objectivity be strengthened and political motivations weakened in the future system Should the system include signed and authenticated reviews and ratings Should the evaluation be an ongoing process such that promising papers are more deeply evaluated How can we bring science and statistics to the evaluation process e g should rating averages come with error bars How should the evaluative information about each paper e g peer ratings be combined to prioritize the literature Should different individuals and organizations be able to define their own evaluation formulae e g weighting ratings according to different criteria How can we efficiently transition toward the future system Ideally the future system will derive its authority from a scientific literature on community based open evaluation We hope that these papers will provide a starting point
