Handbook of Children and Youth Studies Johanna Wyn, Helen Cahill, Hernán Cuervo, 2024-08-20 This second edition of the handbook gives a new scientific perspective to youth and childhood studies as multi scientific and

interdisciplinary subjects which as such have not yet found their own framing in a particular discipline. It provides theoretical and methodological key debates and issues that develop and add an understanding of childhood and youth research discipline from a broader perspective. The Handbook on Children and Youth Studies draws on current thinking but also challenges theoretical and conceptual orthodoxies in the field drawing on interdisciplinary thinking and critical perspectives. It focuses on childhood and youth to address the emerging consensus that the boundaries between childhood youth and adulthood are blurred. The view that defining youth and childhood largely in terms of problem topics is out dated. Instead the handbook focuses on 16 themes that are open to international perspectives and to different conceptual approaches. Each theme is edited by a pair of field editors thereby capturing a plurality of views. The 16 themes as a starting point are globally timely and they need scientific debates on the boundaries between childhoods youth and adulthood. This handbook will meet the needs of childhood and youth researchers and the academics in the field. It recognizes the changing social context of the lives of children and young people while developing theoretical frameworks and discussing about the core substantive issues of Children and Youth Studies.

Wounded Masculinities Valeria Quaglia, 2023-12-05 This book contributes to the emerging field of men's health studies delving into how men incorporate adapt negotiate or reject health care practices to perform masculinities in social interactions. By moving beyond the simplistic association between men masculinity and the adoption of risky or unhealthy practices this book draws from recent critical perspectives on the study of men's health seeking to challenge and problematize the relationship between masculinities and health. The text presents original empirical findings derived from qualitative and digital research examining the different ways in which men re negotiate their masculinities after the onset of a chronic illness focusing on diabetes as a strategic case study. Living with a chronic illness implies that those gender practices that are usually taken for granted suddenly become unachievable and impose a reconfiguration of the masculine self as well as a negotiation of the very meaning of masculinity. The volume aims to critically examine this interactive process of re negotiation while also reflecting on men masculinities and their health on a more general level. This book serves as a valuable resource for students and scholars in social sciences working on the intersection of gender and health as well as for health professionals seeking a deeper understanding of the connection between men gender and health.
