Illustrating Statistical Procedures: Finding Meaning in Quantitative Data Ray W. Cooksey, 2020-05-14 This book occupies a unique position in the field of statistical analysis in the behavioural and social sciences in that it targets learners who would benefit from learning more conceptually and less computationally about statistical procedures and the software packages that can be used to implement them This book provides a comprehensive overview of this important research skill domain with an emphasis on visual support for learning and better understanding The primary focus is on fundamental concepts procedures and interpretations of statistical analyses within a single broad illustrative research context The book covers a wide range of descriptive correlational and inferential statistical procedures as well as more advanced procedures not typically covered in introductory and intermediate statistical texts It is an ideal reference for postgraduate students as well as for researchers seeking to broaden their conceptual exposure to what is possible in statistical analysis

An Introduction to Data Analysis Tiffany Bergin, 2018-10-15 Covering the general process of data analysis to finding collecting organizing and presenting data this book offers a complete introduction to the fundamentals of data analysis Using real world case studies as illustrations it helps readers understand theories behind and develop techniques for conducting quantitative qualitative and mixed methods data analysis With an easy to follow organization and clear jargon free language it helps readers not only become proficient data analysts but also develop the critical thinking skills necessary to assess analyses presented by others in both academic research and the popular media It includes advice on Data analysis frameworks Validity and credibility of data Sampling techniques Data management The big data phenomenon Data visualisation Effective data communication Whether you are new to data analysis or looking for a quick reference guide to key principles of the process this book will help you uncover nuances complexities patterns and relationships among all types of data

The Fertility of Migrants and Minorities in Europe Bianca Brünig, 2023-10-19 This book analyses the relationship between assimilation and fertility intentions for migrants and minorities in Europe Building upon assimilation theory it is argued that both migrants and minorities assimilate in the process of intercultural encounters Given that fertility is part of the cultural dimension of assimilation it is likely to be influenced by assimilation Therefore theories on assimilation and fertility are merged theoretically as well as empirically Using data from the Generations and Gender Survey the empirical section builds upon a comparison of Turkish migrants in Germany and the Turkish minority in Bulgaria Building upon cluster analyses six clusters within Germany as well as five clusters in Bulgaria are developed to account for heterogeneity of groups Comparing these clusters in terms of assimilation and fertility intentions it becomes clear that the Turkish minority does not differ in their fertility intentions from the majority For Germany Turkish migrants differ from German natives regarding their fertility intentions but differences are explained

by assimilation especially structural characteristics When comparing migrant and minority differences in fertility exist and are accounted for by cultural dissimilarity

Frameworks for Modeling Cognition and Decisions in Institutional Environments Joan-Josep Vallbé, 2014-10-15 This book deals with the theoretical methodological and empirical implications of bounded rationality in the operation of institutions It focuses on decisions made under uncertainty and presents a reliable strategy of knowledge acquisition for the design and implementation of decision support systems Based on the distinction between the inner and outer environment of decisions the book explores both the cognitive mechanisms at work when actors decide and the institutional mechanisms existing among and within organizations that make decisions fairly predictable While a great deal of work has been done on how organizations act as patterns of events for boundedly rational decisions less effort has been devoted to study under which circumstances organizations cease to act as such reliable mechanisms Through an empirical strategy on open ended response data from a survey among junior judges the work pursues two main goals The first one is to explore the limits of institutional rationality of the Spanish lower courts on call service an optimal scenario to observe decision making under uncertainty The second aim is to achieve a better understanding of the kind of uncertainty under which inexperienced decision makers work This entails exploring the demands imposed by problems and the knowledge needed to deal with them making this book also a study on expertise achievement in institutional environments This book combines standard multivariate statistical methods with machine learning techniques such as multidimensional scaling and topic models treating text as data Doing so the book contributes to the collaboration between empirical social scientific approaches and the community of scientists that provide the set of tools and methods to make sense of the fastest growing resource of our time data
