effectively leading the student into the the abstract material of the course by the use of motivating concepts from previous math courses to guide the discussion of abstract algebra Bridges the gap for students by showing how most of the concepts within an abstract algebra course are actually tools used to solve difficult but well known problems Builds on relatively familiar material Integers polynomials and moves onto more abstract topics while providing a historical approach of introducing groups first as automorphisms Exercises provide a balanced blend of difficulty levels while the quantity allows the instructor a latitude of choices
