Agrobiodiversity, Community Participation and Landscapes in Agroecology Tomás Enrique León-Sicard ,Diego Griffon,Massimo De Marchi,2024-08-20 Maintaining and managing agrobiodiversity is a key issue proposed by agroecology not only to maintain high agricultural productivity but also to increase the resilience stability and sustainability of the agroecosystems meant as the functional relationship between the natural assets and the human use of them at farm and farm matrix scale The main hypothesis of this approach is that the greater the interactions between organisms of different trophic levels edaphic organisms multiple crops weed plants herbivores carnivores plants in living fences corridors or forest patches within agroecosystems the greater will be the possibilities of obtaining abundant and varied harvests with fewer external inputs pesticides fertilizers and better environmental performance The agrobiodiversity is meant as the variety and the disposition of the cultivations pastures farms that affect the soil properties and create habitat diversity landscape diversity and connectivity At the level of landscapes or territories the set of biodiverse agroecosystems generate natural matrices that have a powerful impact on the recovery and restoration of forest corridors which in turn positively influence many ecosystem services for nature conservation and free movement and recovery of many populations of animal species including those in danger of extinction

Forestry and Biodiversity Fred L. Bunnell,Glen B. Dunsworth,2010-01-01 Sustainable management is a problem for countries that depend on natural resources Forests contain much of the world's biodiversity and offer significant renewable resources with a potentially small ecological and carbon footprint Yet as global demand for forest products increases conserving biodiversity has become more urgent and challenging Forestry and Biodiversity makes the case for adaptive management a structured approach to learning by doing to sustain biodiversity in managed forests It draws on the theory

and principles of conservation biology and forest ecology and illustrates them and the challenges they pose through a practical real world study of a 1 1 million hectare commercial operation in a coastal temperate rainforest
