Race and College Admissions Jamillah Moore, 2024-07-22 In the United States elite colleges and universities have historically catered primarily to wealthy predominantly white Americans creating barriers to entry for students of color Legal

statutes have entrenched discriminatory practices within the admissions process perpetuating the underrepresentation of students of color at top tier institutions Given this reality the imperative for institutions to promote diversity through affirmative action remains crucial However recent legal challenges against affirmative action threaten to reinforce the status quo potentially perpetuating the dominance of predominantly white institutions in higher education This book takes an historical look at the pivotal role affirmative action has played in higher education It examines the admissions process through the eyes of a beneficiary of affirmative action and is the first text to share insights on the role eligibility plays in allowing universities to consider race in admitting applicants Detailed are the different types of affirmative action and how some colleges and universities use the policy as a tool to consider race and ethnicity as part of a holistic evaluation of applicants This work makes the case that race conscious admissions practices remain necessary in the fight for racial equity in higher education
