Reading Randomised Controlled Trials Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03
In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children s literacy but a case study in which the methodology of single randomised controlled trials in education can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education *Understanding Phonics And The Teaching Of Reading: A Critical Perspective* Gooch, Kathy, Lambirth, Andrew, 2008-01-01 This groundbreaking book offers critical perspectives on the teaching of reading and phonics openly challenging contemporary policy in both England and the US **A Guide for Librarians on the Science of Reading** Dr. Daniel A. Sabol, 2025-02-25 The Science of Reading is an interdisciplinary body of research that examines how people learn to read and identifies the most effective methods for teaching literacy Rooted in cognitive psychology neuroscience and linguistics it provides evidence based insights into the processes of reading development emphasizing foundational skills like phonemic awareness phonics fluency vocabulary and comprehension Unlike older disproven methods such as the three cueing system the Science of Reading highlights the importance of explicit systematic instruction particularly in phonics and decoding By understanding how the brain processes written language and applying structured literacy approaches educators can address learning gaps support struggling readers and foster equitable access to literacy for all students This research driven framework is reshaping literacy education worldwide offering a path to improved outcomes for diverse learners *Raising Literacy Achievement in High-Poverty Schools* Eithne Kennedy, 2014-01-03 This book shares lessons gleaned from a two year intervention in a high poverty school which was highly successful in significantly narrowing the literacy achievement gap and in raising children s motivation and engagement in literacy both inside and outside school Kennedy argues that there is much that disadvantaged schools can do to close the gap but this is more likely to occur when a research based approach to instruction with a dual emphasis on cognitive skills and motivation and engagement assessment and professional development is undertaken **Resources in**
