Cli Fi Novel Framework:

The Noah Myth in Twenty-first-century Cli-fi Novels Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, Margaret Atwood's *Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century, climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed, with its insistent focus on redressing social disparities, cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies, literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. *Cli-Fi and Class* focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological, addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy, and Octavia Butler to the film *Black Panther* and the Broadway musical *Hadestown*, this collection unpacks the complex ways economic exploitation impacts planetary well-being and the ways climatic change shapes those inequities in turn.
