Anthropology Economics Geography Government and Politics International Relations Sociology **World Social Science Report 2010** United Nations Educational, Scientific and Cultural Organization,2010-01-01 Social science from Western countries continues to have the greatest global influence but the field is expanding rapidly in Asia and Latin America particularly in China and Brazil In sub Saharan Africa social scientists from South Africa Nigeria and Kenya produce 75% of academic publications In South Asia barring some centres of excellence in India social sciences as a whole have low priority These are a few of the findings from World Social Science Report 2010 Knowledge divides Produced by the International Social Science Council ISSC and co published with UNESCO the Report is the first comprehensive overview of the field in over a decade Hundreds of social scientists from around the world contributed their expertise to the publication Gudmund Hernes President of the ISSC Adebayo Olukoshi Director of the United Nations African Institute for Economic Development and Planning IDEP Hebe Vessuri Director Venezuelan Institute for Scientific Research IVIC and François H ran Director of Research National Institute for Demographic Studies INED France are among the experts who presented the Report during its official launch at UNESCO Headquarters in Paris on 25 June 2010 *Business History in Latin America* Carlos Dávila,Rory Miller,1999-03-01 A new edition of a book first published in Bogot this English edition is a crucial addition to the literature on Latin American business history for a wider English speaking audience and it will be of interest to business and economic historians generally Essays are included by leading economic historians of Latin America from the UK and from other countries Each contributor has managed to relate the business history of a selected country to the main trends in its economic development **Self-Regulation and Co-regulation as Governance Solutions** José Sixto-García, Bella Palomo,Carmen Peñafiel,2024-12-27 The governance of media infrastructures in the European Union has always been a particularly complex affair A notable factor contributing to this complexity is a framework that features a dual funding model where public and private media exist side by side Increasing concerns over the politicization of the media as well as the lack

of transparency concerning their ownership have made things even more complex The European Union's Media Pluralism Monitor has highlighted the weaknesses of information pluralism in a context where researchers are compelled to study the role that artificial intelligence automation is playing in both the creation of content and the development of spyware technologies for the surveillance of journalists In response to these concerns the European Commission has proposed the adoption of a new set of rules known as the Media Freedom Act the chief purpose of which is to protect media pluralism and independence within the bloc The Act raises a number of important questions however For example it is not prima facie clear whether media independence can or should be regulated some might even go so far as to argue that doing so would be a plain contradiction in terms and just how much pluralism there should be within a committee whose job is to evaluate information pluralism

Economics of Social Relations Atilano Pena-López, Matías Membiela-Pollán, 2024-11-22 Starting from the idea that economic relations are social relations and every economic fact is first a social fact this book explores one of the crucial problems within economic science how to embody the social dimension into the study of economic reality from a critical perspective This book opens with an examination of the concept of social capital incorporating all the approaches from the last 30 years of analysis It reviews the two main orientations of existing research programmes in social capital the macro or culturalist perspective and the micro or individual social capital Furthermore it proposes a reconstruction of the theory from a micro perspective Finally taking this approach this book explores the link between social capital and the negative aspects of social reality such as corruption or inequality and through the study of so called relational goods the influence of social capital on subjective well being The analysis of the concept of social capital not only involves economists but also requires a necessary bridge with sociology anthropology political science and even psychology This book will therefore be crucial reading for anyone engaged in the problem of the interrelation between economy and society
